

TRANE®

Systems Guide

*Equipment, controls and services
for integrated HVAC-R solutions
in commercial and industrial markets*

Who we are

Trane, a brand of Ingersoll Rand, designs, manufactures and services HVAC-R systems and controls to create and sustain safe, comfortable and efficient work environments for buildings and industrial processes.

We offer a collective knowledge-based system with the applications expertise to create truly comprehensive solutions. With our broad product and service offerings plus premium aftermarket and rental services, Trane can help customers achieve their business objectives. Our integrated solutions help reduce energy use and costs while meeting the high levels of comfort and performance critical to our customer's business operations.

Total life cycle management

Our capabilities span every step in your HVAC systems' life cycle. As an industry leader, we deliver Performance, Innovation, Commitment and Knowledge at every turn. A long-term relationship with Trane ensures that your original investment delivers a solid return.

At the **concept and design** stages, collaboration between Trane and the design engineering team ensures that the HVAC system specified is ideally suited to deliver long-term cost and performance benefits, based on the purpose of the building and the mission of your organization. Our **wide-ranging equipment and controls selection** offers solutions to meet every need. The recent expansion of our line of multi-pipe units is one example of Trane commitment to provide sustainable solutions to applications looking to simultaneously deliver heating and cooling.

At the installation stage, our **commissioning offerings** ensure that the new equipment or system is properly started and operates at design parameters.

With a **full range of aftermarket capabilities** and an extended service network, Trane offers parts and services to suit very specific requirements. Trane engineers and technical specialists can provide the support you need to gain the most cost-effective and beneficial performance possible from your HVAC system—from its first days of operation until the day it needs replacement.

Finally, **Trane Rental Services** is also there to keep businesses operational with emergency or planned events. Whether for short-term or long-term cooling or heating, Trane Rental Services provide fast, safe and cost-effective solutions using modern and reliable equipment.

Working towards high performance buildings

Energy efficiency, system reliability, occupant health and safety, processes for environmental compliance... everything in a high performance building works in a synchronized way to support the mission and values of the organization.

Trane offers a holistic, assessment-based approach to ensure HVAC systems constantly deliver as effectively as possible. **Trane Building Advantage** provides modernization solutions that can virtually improve any existing structure.

What's New from Trane

UniTrane™ DFS/DFE and BFS ducted fan coils

Ideal air-conditioning solutions for your building

Trane's new UniTrane™D-Line and B-line ranges meet today's requirements of performance, size, acoustics, **low energy, ease of installation and maintenance.**

- Suitable for horizontal and vertical installations
- Low energy consumption EC or standard AC fan motors
- 2-pipe and 4-pipe configurations
- Multiple row configurations
- Wide selection of factory-mounted options, site-mounted accessories and controls
- Ecodesign Compliant - ERP 2015 Regulation (EU) No. 327/2011

The Unitrane™ B-Line fan coils range has been developed to deliver a greater available static air pressure for concealed installation and connection to a duct system.

RTWF and RTHF water-cooled screw chillers and heat pumps

High efficiency chillers for high performance buildings

The new Trane Xstream™ models RTWF and RTHF provide reliable and dependable performance to ensure continuous **delivery of precise temperature control** across the full spectrum of demanding comfort and industrial applications.

Combined easy-to-use control interface and Tracer™ Adaptive Control™ intelligence drive system reliability and interoperability, reduced energy consumption and intuitive interaction with your chiller.

- Industry leading EER and ESEER
- Superior versatility – suits comfort cooling and precision process temperature control
- Minimized Total Cost of Ownership
- Legendary Trane reliability!

As RTWF is also a **water-to-water heat pump** able to produce water up to 68°C, it perfectly suits the market needs for high condensing water heating applications, including geothermal applications.

Sintesis RTAF air-cooled screw chillers up to 1911 kW

The best bundled in one. Our best.

Trane has combined the best **efficiency and performance in one system**. Trane Sintesis provides leading temperature control in the most demanding applications.

Trane Sintesis is simply the best synthesis of:

- Energy Efficient - Four efficiency levels to meets the needs of your building, your climate and your budget.
- Quiet - Three levels of noise attenuation with no compromise in operational efficiency.
- Reliable - At Trane we manufacture and design the core components and put our systems through extremely demanding performance and reliability tests.
- Smart - It has the capability to provide all-year cooling in ambients from -18°C up to 55°C. It is ideally suited to industrial applications and is Ecodesign 2016 compliant. Operation could not be easier thanks to smart controls and a user-friendly touchscreen interface. Connectivity with Modbus, BACnet®, LonTalk® and Trane BMS is simple with the Smart Com interface.

Multi-pipe units - CMAB air-cooled scroll units

Simultaneous heating and cooling with one product

The continuous drive to **improve energy efficiency** of building systems requires an optimal balancing in the demand and supply of both heating and cooling. In many buildings, simultaneous heating in some spaces and cooling in other spaces is needed. Continuously changing heating/cooling demand over the day is due to internal heat loads from people and IT equipment, seasonal weather and changing sun exposure.

Trane's sustainable solution: An innovative concept called **multi-pipe units**, designed to **simultaneously deliver hot and chilled water**.

- Optimal use of renewable and recovered energy
- Full energy recovery for the best return on every kilowatt-hour of electricity
- Unique controller software autonomously balancing cooling and heating capacities
- Unlike traditional reversible heat pumps, multi-pipe units have two separate heat exchangers: one for chilled and one for hot water production

Multi-pipe units are suitable for many applications, particularly in countries with mild winters or in buildings where the heating system is designed for hot water inlet temperatures of 35-60°C.

What's New from Trane (continued)

Sintesis Excellent GVAF high speed centrifugal chillers

Unique on the market, only by Trane

Sintesis eXcellent is a new model within Trane's Sintesis range able to reach market-leading Energy Efficiency Ratio (EER) and European Seasonal Energy Efficiency Ratio (ESEER) with lower sound levels.

This model GVAF is available with a choice of refrigerants: R134a or R1234ze which has a GWP value of less than one to exceed current F-Gas legislation requirements and help customers reduce their carbon dioxide (CO_2) emissions and achieve extreme part load and full load efficiencies.

- provides a wide capacity range up to 1.6MW
- EC fan motors to reach higher part load efficiencies with lower sound levels
- Double refrigerant circuit
- Economizer circuit
- EMC filter to avoid harmonic transfer to compressor
- Designed to enable significant savings from total or partial free-cooling.
- Leading control combination Trane Tracer UC800 and TD7 display.

UniTrane™ WFS/WFE high wall fan coil units

A smart choice for hotels, commercial and residential applications

UniTrane™ W-Line is Trane's high wall fan coil unit designed for optimum comfort and high performance. Available in 4 sizes and many different configurations, W-Line is easy to install and use, just like a standard fan coil. The modular design allows for mounting 2-way or 3-way valves and condensate pump into the casing, without any impact on performance and footprint.

Thanks to its modern and appealing design, the W-Line can be used for a wide range of 2-pipe applications. All sizes can be provided with standard AC fan motors (WFS) or low energy consumption EC fan motors (WFE).

Trane offers a large selection of factory-mounted options, site-mounted accessories and controls.

Rooftops

Ideal for retail applications

With Trane Airfinity™ Rooftops, you can be sure we will deliver what you need: high performance, proven reliability and easy installation. In the end, Trane rooftops deliver real value for you – and real comfort for your customer.

- Ideal performance & lowest cost of ownership - Airfinity rooftops can deliver high seasonal efficiency standards capable of meeting future European regulations such as EcoDesign.
- Integrated plug & play solution - compact and modular design with fully integrated controls, installing and operating a rooftop has never been so easy. Even the heat recovery module has been designed so that you do not need an additional roofcurb.
- Immediate replacement - designed to be fully compatible with multiple roofcurbs, without expensive adapters or other modifications.

Real comfort & Indoor Air Quality - multiple filter solutions, up to 100% fresh air management

Solar-ready Rooftops

Powering solar-ready rooftops with PV panels

Air-conditioning and ventilation can represent up to 80% of your commercial building's energy consumption. Ironically, these systems consume valuable peak power at the same time that solar energy is most available. By installing solar panels to power your HVAC equipment, you can reduce your carbon emissions and peak time electricity consumption. At the same time you can put unexploited rooftop space to good use while protecting your operation from future electricity price fluctuations.

Trane has committed to developing a solution that can reduce your operating costs while using sustainable and clean energy. We call it Airfinity™ Solar.

Trane Airfinity™ Rooftops have been specially designed to be solar-ready. That means you can now use clean solar energy to partially or totally power your air-conditioning system while continuing to benefit from the quick and easy installation of a direct expansion system.

= Maximum leaving water temperature

There is world-wide demand for sustainable and more efficient products to reduce energy and resource consumption.
Trane is committed to innovating and manufacturing products which are fully compliant to EU legislation on Ecodesign
and energy labelling.

Ingersoll Rand's Climate Commitment

Ingersoll Rand is helping to solve some of the world's most pressing challenges – including the unsustainable demand for energy resources and its impact on the environment.

To create a sustainable future, Ingersoll Rand announced a profound climate commitment in September 2014 – a roadmap to significantly increase energy efficiency and reduce our environmental impact from our operations and product portfolio by 2030 (with milestones at 2020). Our climate commitment has three prongs and includes:

- o 50 percent reduction in the direct GHG potential for our HVAC products by 2030
- o 35 percent reduction in GHG footprint of our own operations by 2020
- o \$500 million investment in product-related research and development over the next five years to fund the long-term reduction of GHG emissions

This commitment benefits customers and the climate by creating more sustainable product choices for customers, improving our operating footprint globally, and continuing to develop lower GHG emissions options in areas where none exist today. This commitment will result in the avoidance of approximately 20,850,000 metric tons of CO₂e globally by 2020, which is equivalent to the energy used by nearly two million homes for one year.

EcoWiseTM

Ingersoll Rand has created the EcoWise™ portfolio of products for its climate and industrial refrigerant-bearing products that are designed to lower environmental impact with next generation, low global warming potential (GWP) refrigerants and high efficiency operation. These products are compatible with and can use next generation low GWP refrigerants, reduce environmental impact by lowering greenhouse gas (GHG) emissions, and maintain or improve safety and energy efficiency through innovative design.

The first Trane branded products to earn the EcoWise endorsement are:

Trane Sintesis™ air-cooled chiller is energy efficient and quiet, and offers customers the choice of operating with a next generation, low GWP refrigerant -- DuPont™ Opteon® XP10 (R-513A) or with R-134a.

Trane Series E™ CenTraVac is a large-capacity chiller that uses the same low-pressure design on which current CenTraVac chillers were based, and uses a next generation, low GWP refrigerant, Honeywell Solstice™ zd (R-1233zd(E)). It is up to 10 percent more energy efficient than the next available centrifugal chiller available today.

Trane, Providing Sustainable, Efficient Products

There is world-wide demand for increasingly efficient products to reduce energy and resource consumption. The EU legislation on Ecodesign and energy labelling is an effective tool for improving the energy efficiency of products. Ecodesign fosters innovation and eliminates the least performing products from the market, significantly contributing to the EU's 2020 energy efficiency objective. At the same time it supports industrial competitiveness by promoting the better environmental performance of products throughout the EU internal market.

Trane policies support the objectives set by the European Union with respect to energy consumption reduction of 20% between 2008 and 2020.

As part of Trane's sustainable product policy, Trane has always been committed to respecting the environment by reducing energy consumption through the delivery of high performing and efficient products and systems.

What is Ecodesign?

The European Union Directive 2009/125/EC, also known as "**Ecodesign Directive**", established a framework for the setting of Ecodesign requirements for energy-related products. The mandatory requirements are implemented through product-specific regulations and directly applicable in all EU countries.

One of the product-specific regulations in this journey impacts Trane's portfolio of reversible heat pumps and multi-pipe units, with a maximum rated heating capacity of up to 400 kW.

New Metrics To Understand

η_s (etas) = Seasonal Primary Energy Efficiency.

To allow comparison with other heating products using gas or any fossil energy, η_s is going to be expressed in % of primary energy.

η_s qualifies heat pump/multi-pipe unit efficiency in a *different way* than **COP** was doing, by taking into account:

- Full and part load operation of equipment, rating efficiency at several loads and temperatures, rather than one single point at full load
- Additional electricity consumption of auxiliary modes (Thermostat off, Standby, Off Mode, etc...)
- Operating time according to various temperatures

SCOP, Seasonal Coefficient of Performance, is a translation of η_s using the ratio to primary efficiency. In Europe, the primary efficiency ratio is 2.5, meaning that 2.5 kW of primary energy (fuel, gas etc...) is needed to produce 1kW of electricity.

Consequently: **SCOP = $\eta_s \times 2.5$**

Minimum Efficiency Thresholds for Heat Pumps and Multi-Pipe Units

From September 2015:

Medium temperature, hot water at 47/55°C: $\eta_s = 100\%$ (or SCOP = 2.5)

Low temperature, hot water at 30/35°C: $\eta_s = 115\%$ (or SCOP = 2.875)

From September 2017:

Medium temperature, hot water at 47/55°C: $\eta_s = 110\%$ (or SCOP = 2.750)

Low temperature, hot water at 30/35°C: $\eta_s = 125\%$ (or SCOP = 3.125)

Energy labelling

- Required on all products under 70 kW rated heating capacity
- Provides consumers with clear and easy to understand information
- Product energy efficiency classes range from G to A

Energy efficiency classes

Class	Boilers and mid-temperature heat pumps (operation at 47/55°C)	Low temperature heat pumps (operation at 30/35°C)
A*** (from Sept 2019)	$\eta_s \geq 150$	$\eta_s \geq 175$
A**	$125 \leq \eta_s < 150$	$150 \leq \eta_s < 175$
A*	$98 \leq \eta_s < 125$	$123 \leq \eta_s < 150$
A	$90 \leq \eta_s < 98$	$115 \leq \eta_s < 123$
B	$82 \leq \eta_s < 90$	$107 \leq \eta_s < 115$
C	$75 \leq \eta_s < 82$	$100 \leq \eta_s < 107$
D	$36 \leq \eta_s < 75$	$61 \leq \eta_s < 100$
E	$34 \leq \eta_s < 36$	$59 \leq \eta_s < 61$
F	$30 \leq \eta_s < 34$	$55 \leq \eta_s < 59$
G	$\eta_s < 30$	$\eta_s < 55$

All Trane Heat Pumps and Multi-Pipe Units are fully compliant with the Ecodesign Directive, also being a pre-requisite to obtain CE compliance.

By acquiring one of our products, you have the peace of mind that your HVAC system will be one of the most efficient systems available on the market today....while offering the lowest life cycle costs for years to come.

Proven performance to make buildings work better

Businesses around the world are being challenged to improve energy efficiency. According to the World Business Council for Sustainable Development, buildings worldwide account for 40% of global energy consumption. Of that amount, between 45% and 65% is used by HVAC systems that keep building environments comfortable and healthy. The slightest inefficiencies in cooling and heating equipment create a huge energy drain and the financial impact is significant. Trane captures emerging technologies when designing products, and develop with energy efficiency, and low operating costs in mind, to allow building owners to manage energy better. Whether it is a chiller rated Class A in the Eurovent* certification program – or water terminals equipped with an EC fan motor – saving the customer energy costs is one of Trane's priorities.

The proof is in the testing

The testing process starts in research and development. We look at environmental performance, acoustic characteristics, operating longevity, and overall operating efficiency.

At Trane, computer selection programs predict equipment performance based on laboratory testing.

Factory performance tests confirm that the actual Trane product performance matches the predicted performance and the results serve as a benchmark during the commissioning process.

We are committed to the highest level of design and manufacturing accuracy to make sure that your products performs as expected.

Trane European HVAC Research and Development Testing Facilities fully comply with European Standard EN 14511, meaning that procedures, measurements and conditions are respected to provide our customers with trustable and certified performances.

Eurovent certification of air-cooled chillers is on a voluntary basis above the cooling capacity of 600 kW. Trane's commitment to deliver guaranteed performance is demonstrated by Eurovent certification of all capacities across the range of Trane products.

After an extensive and rigorous inspection process conducted by Eurovent, Trane's test stands in Charmes, France are approved for conducting Eurovent certification tests for air-cooled chillers above 600 kW, recognizing the right to Trane to test chillers up to 1,500 kW in his own facilities as part of the certification program.

The Eurovent certification brings clarity and transparency. It also shows the Trane commitment to deliver systems with high levels of performance and reliability.

*Eurovent, the European Association of Air Handling and Refrigerating Equipment Manufacturers, certifies the performance ratings of air conditioning and refrigeration products according to European and international standards. The objective is to build customer confidence by increasing the integrity and accuracy of industrial performance ratings.

TRANE®

Trane HVAC Systems

Every building has a purpose, whether it's to nurture inventions, house masterpieces, cultivate learning or even to host birthday parties. A true high performance Heating, Ventilating and Air Conditioning (HVAC) system is one that makes your building work better for life.

Trane solutions for the lodging industry

Reaching for perfection

Maintaining a high and consistent level of comfort is critical in the lodging industry. Hotels succeed or fail based on their ability to achieve high occupancy levels at profitable rate levels. The prime influence on this occupancy rate is guest satisfaction. A room that is uncomfortable creates a powerful negative impression. Trane has both experience and a portfolio of products to help operators of hotels attract and retain guests.

Trane Balance™ high efficiency multipipe units provide simultaneous delivery of 0 - 100% heating and/or cooling all year round, increasing guest comfort in each hotel room, and significantly reducing energy costs.

Trane has decades of experience working with the lodging industry, from individual hotels to global chains. Energy is the second-highest operating cost component in the lodging industry. We know that from 50 to 80 percent of the energy costs in lodging are related to HVAC system operation and have the solutions to keep your energy costs to a minimum with efficient equipment and high performance building management systems.

- 1 = Chilled water plant: 2 Conquest CGAX scroll chillers with factory-mounted controller
- 2 = Fresh air control: AHU with Trane factory mounted-control (UC400/UC600)
- 3 = Room comfort: DFE with EC fan motor and Trane factory-mounted control (ZN525/UC400)
- 4 = Humidity air control for gym and swimming pool: AHU with UC600
- 5 = Building systems operations and management: Trane Tracer Ensemble™ and Tracer™ SC web-based solutions
- 6 = Access and room booking systems integration: through standard BACnet® protocol

Control systems improve comfort, simplify maintenance and optimize operation

Within your lodging facility, there are areas with varying requirements. Guest rooms, lobby areas, dining areas and recreation zones all have different environmental requirements. Food preparation areas need extensive ventilation and to be kept separate from other areas. Pools and gyms also have special temperature requirements and need effective dehumidification year round. Part of the solution is quality equipment, properly sized, and correctly installed. The other part is a control system that can keep all areas operating in harmony.

A control system also makes it possible to optimize equipment operation. For example, in a chilled beams system, the primary air conditions (temperature/humidity) can be reset according to the most demanding zone.

Comfort systems and the bottom line

Trane's international organization appreciates that different regions have varying comfort needs, building codes, and engineering practices. Our vast local sales and service support teams, with their extensive local experience and customer relationships, add value to your plans. Regardless of the size or scale of your lodging business, we're ready to help.

Building operation at your fingertips

With Trane web-based BMS solutions, the overall building operation can be monitored and managed from anywhere. Alarms and events are routed to operators' smartphones and computers, wherever they sit, no matter how many users there are.

Trane solutions for retail businesses

Creating the perfect atmosphere

From simple stores to modern shopping complexes, Trane has experience in the retail business. We know that the temperature, humidity and ventilation management needs of stores are different than for other buildings.

Leveraging our experience, we can help you identify specific areas for energy and comfort improvement and keep your buildings operating at their design levels. And with contingency planning and our thousands of equipment and controls technicians, we can help you reduce the risk of sales lost due to comfort system failure.

Delivered system

Trane's light commercial BMS only requires a few settings to be implemented on an application. Thanks to the capability of any Trane HVAC equipment to communicate over a network, the BMS manages to identify these equipment linked together, builds the corresponding database and automatically offers to the end user predefined functions such as time-of-day schedule, automatic setpoint reset, zone management or alarming menu, with almost no labor required.

If you want to customize your interface, convenient software is available to do this. The system is compact and convenient to install and wire up. Trane's equipment uses open standard protocols, which are often present in retail buildings.

- 1 = Space temperature and humidity control: Voyager™ rooftop units with factory-mounted control: ReliaTel™
- 2 = Lighting control: either through Trane dedicated I/O controller (MP581, UC400, UC600) or by integrating a specific lighting control system through standard protocol (BACnet® to DALI as an example)
- 3 = Building systems operations and management: Trane Tracer Ensemble™ and Tracer™ SC web-based solutions
- 4 = Cold aisle retrieval: AHU with Trane factory-mounted controls (UC600)
- 5 = Air curtains: DFE with EC fan motor and Trane factory-mounted control (UC400)
- 6 = Office space comfort: DFE with EC fan motor and Trane factory-mounted control (UC400)
- 7 = Retail store comfort: VAV with Trane factory-mounted control (UC210/UC400)
- 8 = Energy metering and monitoring: meters integrated through communication protocol, and data presented as graphs on the Trane Tracer™ SC/Tracer Ensemble™ custom web pages

The advantage of single sourcing

Trane's delivered system offers an additional perspective, since every piece of the puzzle comes from the same manufacturer. It is far easier to coordinate equipment delivery, commissioning and fine tuning, since only one contact is involved for this. On top of this, Trane personnel are well trained for the entire system components, ensuring efficiency in commissioning, and fast response.

Energy savings

Various pre-engineered tactics, such as setpoint reset, time-of-day scheduling and duty cycle, have been implemented in the system to improve system energy efficiency, without altering system comfort management capability. Trane's system is easy to install, set up and use. This means that system updates, daily operations and maintenance can be done by operation personnel very easily, requiring very little training. Trane's system also has the capability to control ancillary equipment, such as lights, parking lots, energy meters, and any equipment controlled by a time-of-day schedule. Trane's delivered BMS for commercial applications is a powerful answer to customers who want a very easy-to-use system, capable of simplifying their life all along the project life cycle.

Trane solutions for industries

Reliable Trane systems your industry can count on

Trane has a wide experience in industrial control applications, starting from simple chillers to complex systems that are optimized for improved efficiency. One of the highest priorities of Trane engineers when designing an industrial application is to ensure a system that is reliable. Trane proposes systems that can revert to a safe standalone running mode should any issue such as communication troubles arise, continuing to deliver cooling capacity until the issue has been analyzed and fixed. In addition, Trane always proposes simple-to-use user interfaces which offer just the right amount of information about system status and running conditions. Since every piece of equipment is hooked up to a network, the user can access system and units information at any time, allowing for easy diagnosis, and easy understanding of system reactions.

Variable Primary Flow (VPF) capabilities

VPF systems provide building owners with multiple cost savings derived directly from pump operation. Trane chillers are designed to make VPF easy to use.

With the help of a TRANE software analysis tool, you can determine whether the anticipated energy savings justify the use of VPF in a particular application.

1 = Critical systems monitoring - Electrical power, cooling loads

2 = System water flow control - Variable frequency pump control: VarioTrane TR200

3 = Chiller condenser operation - Cooling towers control: UC600

4 = Chiller plant control: 3 XStream™ helical-rotary chillers with factory-mounted UC800, Twin pump control for each chiller: Tracer™ SC

5 = System monitoring and control - Supervision: web-based Trane Tracer Ensemble™ and Tracer™ SC

Chiller Plant Management

Application is a pre-engineered function within Trane controllers, as to deliver a consistent, reliable and repeatable performance from project to project, with a minimum commissioning time.

Personalized optimization

Chiller technology and unit sizes arrangement are analyzed so you get the best result of their installation, according to their system load profile. Chiller Plant sequencing is a powerful pre-engineered function that only requires parameters to be able to drive the installation at its highest level of optimization.

Technical services

Trane proposes its simulation and solution evaluation software. Using this tool, you can easily evaluate the best alternative for solving a problem, by viewing the solutions from different angles, such as economical aspects, technical aspects, safety and reliability.

Trane Building Services

It is easy to get assistance from Trane in concluding a maintenance and service contract including HVAC and BMS equipment/software. This way, system fluctuations, fine tuning etc. can be done by people working in sync with those teams that have originally developed the application. This ensures service continuity as well as efficiency in answering any request of system improvement or adaptation.

Trane solutions for office buildings

Adapted to your evolving requirements

In addition to HVAC application solutions for large scale building projects, Trane has developed one of the most open Building Management System solutions available on the market. Trane's BMS caters to office building comfort applications with fully optimized functions.

These functions offer several unique advantages to you along the project cycle.

Trane's BMS is a highly flexible system that offers ease of (re)configuration. This allows the system to be adapted at every step of a project. Large buildings regularly require space rearrangements (open space) and Trane's system is fully capable of managing space reconfiguration, thanks to advanced master/slave capabilities of terminal unit's controller, perfectly fitted in the global BMS.

Trane's BMS is based on the latest web technologies, allowing for a high performance User Interface, as well as full flexibility with regards to accessing the system. Using a simple web browser software on any PC connected to the customer network, users can monitor and manage the assets, from wherever they are.

The system then allows multiple users to access the system simultaneously, improving the overall productivity in the asset management team.

Building its own electronic components was a choice that Trane made as to perfectly master the complete product life cycle, from development, engineering, manufacturing, up to maintenance, support and upgrade. This means that Trane's solution is reliable and offers full equipment integration and system interoperability.

- 1 = Weather information
2 = Chilled water plant: helical-rotary chillers with factory-mounted UC800: chiller plant control application
3 = Primary air control: AHU with factory-mounted UC600
4 = Open space comfort: Fan coil units with factory-mounted controller
5 = Environmental comfort: Lighting control, Sunblind control
6 = Tenant interface: setpoint and room conditions information: web server
7 = Web server application (Tracer™ SC / Tracer Ensemble™) broadcasting web pages to any workstation in the building
8 = Variable air flow control AHU and VariTrane™ valves: UC600, UC400 and UC210
9 = Hot water plant: heat pump control application
10 = Electrical power monitoring
11 = Interoperability: access control system monitoring: BACnet®+ LonTalk®

System efficiency

Trane has developed pre-engineered functions within Tracer controllers that allow a high level of system efficiency which can be seen from different angles:

Efficient commissioning - Minimum programming is required to set up these functions and the BMS project engineers can spend more time in fine-tuning the system rather than developing the applications from scratch.

Perfect equipment coordination – Each piece of Trane HVAC equipment comes with its own factory-mounted controller. All these controllers have been developed keeping in mind their possible association within a system and thus, their interaction is possible within Trane's BMS.

Fine-tuning- Trane's BMS allows operations managers to get a customized report of the current system status, by the simple click of a mouse.

Total comfort

Trane's excels in developing HVAC equipment. Trane's engineers go further to consider the equipment in their global environment. This means that on top of ensuring equipment safeties and running condition efficiency, care has been taken to ensure low sound levels, energy savings, etc. Through the use of Trane's BMS, these aspects of equipment running conditions are further improved. As an example, a VAV box can be driven according to pressures and running conditions of the AHU that is serving it. Or the AHU that delivers primary air to a chilled beam system would shift from air-economizer mode to mechanical dehumidification if the outside air becomes too humid. The equipment exchanges data in order to align the respective working conditions to deliver the optimum service to the end user.

Chiller plant system applications

Trane's proven expertise in chillers has led to the development of advanced chiller plant control applications within its Building Management System. The system is also fully capable of handling boiler plants.

Trane is the expert in providing advanced HVAC applications knowledge. For example, our Variable Primary Flow system enables savings both on the equipment capital costs and operational costs. The use of other solutions, like ice storage, condensing pressure optimization, free cooling, heat recovery, water source heat pump systems, can bring your process up to 60% in energy savings. Trane will help you in selecting, designing and documenting the best systems for your building needs.

Most efficient results can be achieved with well-prepared piping arrangement. Trane specialists in hydraulics and chillers application always review the system drawings before any proposal is made. This helps Trane to clearly point out what the installation is really capable of delivering, and to position these capabilities regarding what is expected.

Once this is clear, Chilled Water System Management adds advanced capabilities to the customer's installation:

Flexibility

Chilled Water System Management offers flexible interfaces to operate a chiller plant. By a few mouse clicks, chillers can be turned into maintenance, sequence numbers can be adjusted and rotation can be initiated. The same interface also helps operation personnel exactly know what the installation has been doing, is currently doing and will be doing in the near future. At any time, the operator can anticipate system reactions. System graphics for plant operation can be monitored from an Intranet, using a web browser.

Energy savings

Chilled Water System Management, including Variable Primary Flow, always ensures that chillers are used in their most efficient operation conditions. Unit technology and environment conditions are monitored by Chilled Water System Management, which adjusts parameters according to changes in the system running conditions.

Should there be a change, the system anticipates and adds/removes chillers accordingly. The system also controls all ancillaries such as pumps, cooling towers, and dry coolers.

- 1 = Data and system functions management: Tracer™ SC with local display
 2 = Ancillaries control (pumps, cooling towers, etc ...) field-programmable controllers (UC400, UC600)
 3 = Plant control panel monitoring: field-programmable controllers (UC400, UC600)
 4 = Water flow control: VarioTrane VFD's (TR200 series)
 5 = User interface: local touchscreen PC, or any PC connected through web browser, web pages served by Trane Tracer™ SC
 6 = 3 RTHD helical-rotary chillers with Tracer UC800 Controller and TD7 Interface

Reliability

Chilled water production is crucial for your process and Trane's system ensures continuous delivery of chilled water. Every chiller is equipped with its own electronic controller embedded with an adaptive control algorithm. Each controller is fully compatible with the Building Management System and communicates over a standard protocol, sharing all its running conditions. This allows the management system to not only turn on/off chillers according to temperatures or temperature differences, but also consider current running conditions of chillers, such as maximum capacity reached, limit conditions, and so on, in order to know system capacity at all times.

Interoperability/integration

Trane systems are fully capable of communicating with any equipment and/or management system through the use of open standard protocols, such as BACnet®, or LonTalk®. Modbus is also supported allowing for a wide range of integration and data sharing with ancillaries, such as pumps, sensors or PLC's. Trane systems are capable of integrating either standard LonTalk® profiles as well as BACnet® MS/TP or IP-based devices.

Protection

Trane systems offer a high level of protection against unexpected system operation. Operators can be authorized to monitor data only, write setpoint and other parameters, create graphics or just view them, modify system layout, and so on. Every action on the system is recorded in an event log. Events can then be monitored, filtered by date/operator/device, etc. Events can be seen either at the PC level, or from a local touchscreen available in the plant room.

Assistance

Trane systems allow for system remote monitoring. Alarms can also be forwarded remotely. Trends, event log, system status can be accessed from any location where an access to the Internet/intranet is possible. After commissioning, Trane personnel can get connected to the system and monitor/fine tune parameters to adapt the overall system performance.

Water system applications

Water terminal units and chillers are Trane core products. Understanding how this equipment is being used together is part of Trane know-how that has been converted into a Management System. Other equipment serving building comfort system is also under Trane system, control such as air handling units, exhaust fans, water treatment, but also ancillaries such as lights, power distribution panels, and so on. The system that Trane offers covers key points for a project to be successful.

Comfort

Trane has developed advanced electronic controllers that offer individual comfort at each terminal unit level.

- Temperatures are monitored and controlled to stay within limits each user can adjust wall sensors or web pages.
- Sound level is maintained at its minimum value and air movement reduced as much as possible by the control of fan speed. Trane's offer also includes chilled beams which operate without a fan guaranteeing very low sound levels.

- Comfort is maintained year-round; cooling/heating modes are controlled automatically and intelligently, change over being totally transparent to the occupant.
- Comfort for the operation manager is also ensured. Master/slaving is now very easy to set up and reconfigure. Open space re-design can be done in very short period of time.
- Indoor Air Quality (IAQ) is also one of the advantages of a Trane system which is capable of monitoring and maintaining IAQ within optimum limits.

Ease of use

Trane systems communicate through open protocols (LonTalk® BACnet®). The system handles several types of user interfaces, so that every user can have access to the information he needs.

- Terminal units can be equipped with wall sensors embedding indications such as setpoint, timed override, and temperature values. This information can be adjusted within pre-determined limits.

- 1 = Open space comfort: UniTrane™ fan coil with factory-mounted controller
 2 = Ancillaries control: Lighting control: EXL, Sunblind control: EXB
 3 = Open space comfort: UniTrane™ fan coils with factory-mounted controllers
 4 = Tenant interface: Setpoint and room conditions information: Zone Sensor (ZSM 10.1, ZSM 10.2, ZSM 11)

- Operation managers can have access to system status by using an advanced graphical interface running on a PC. This status can be filtered and organized according to the use. Software interfaces integrate a user-friendly graphical interface allowing authorized users to change/create graphics to optimize them for their own use.
- Operation engineers can have access to system information in the different technical locations in the building by the use of VGA touchscreens, on which local data are presented.
- Time-of-day (TOD) scheduling offers a very convenient interface for TOD adjustment, group/zone creation or modifications.
- Every single piece of equipment in the system can be focused on. It can be overridden in any state as for maintenance or test purposes.
- Equipment or system alarms can be monitored and broadcasted on the system so that the best recipient can get a notice for this particular event and react in the most efficient manner.
- A web server allows for system performances monitoring from a PC equipped with a simple browser.

Savings

Through the coordination of all equipment within the building, it is quite simple for the management system to optimize energy consumption. Savings also are available at system design and system commissioning phases.

- Water system management can be organized, so that either chilled water or hot water production is handled in the most efficient way.
- Equipment schedules integrate a function of optimization, which determines building inertia and adjusts start/stop time according to temperatures/relative humidity and building occupancy.
- Each Trane piece of equipment is delivered with factory-mounted controls which are ready to work when the equipment leaves the factory.

Coordination of production (cooling/heating) and use (fan coils, air handling units, chilled beams...) is one of the best approaches to optimize system operation.

Communication is the key factor for this to be efficient. Communication is also an essential factor for some HVAC systems, such as chilled beams in which indoor terminals rely on the primary air AHU for zone humidity control. All Trane equipment integrates a standard protocol interface.

Notes

TRANE®

Chillers

More than half of the large buildings in the world today have a Trane chiller at their core. Not only do our chillers help create comfort, they also help reduce your cost of operation, provide energy efficiency and minimize environmental impact.

CGA

Air-cooled scroll chiller

Customer benefits

- Digital Defrost is a self-adaptive defrosting system able to intervene only in case of a consistent thickness formation of ice on the coils' fins.
- Dynamic Logic Control manages the differential of the inlet water temperature on the basis of the speed of its variation. Thanks to the DLC the number of the compressor starts decreases ensuring economic and energy savings.
- Dynamic Set Point function allows changing the setpoint simultaneously to always achieve the conditions of best comfort and maximum energy savings.

Main features

- Scroll compressor
- Axial fans propeller type
- Airside heat exchanger with seamless copper tubes and aluminium fins
- Waterside heat exchanger steel brazed plate fitted with differential pressure switch and antifreeze protection electric heater
- Low ambient condensing pressure control with variable fan speed modulation
- Electrical panel with main switch
- Casing and panels in galvanized and painted steel

Options

- Low ambient temperature kit (down to -10°C)
- Low water temperature kit (down to -6°C)
- Hydraulic module with water pump
- Hydraulic module with water pump and water tank (delivered separately)
- Compressors sound jackets
- Soft - starter
- Control panel electric heater with thermostat
- Phase failure protection relay
- Epoxy coated condensing coils

Accessories

- Remote control panel
- Communication card RS485
- Flow switch
- Automatic water filling
- Water strainer
- Water gauges
- Rubber anti-vibration mounts

Controls

- Microprocessor-based controller to manage unit on/off mode, operating mode setting, parameters setting, and error code display

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

Operating outdoor air temperature range (min./max.) (1)	(°C)	-5 (-10) / +43°C

This is an averaged value considering the unit as a paralelopipedic box with five exposed face areas.

(5) Excluding water tank

Flex

Air-cooled modular scroll chiller

Customer benefits

- Ultimate flexibility: up to 12 units can be combined into one system in order to reach the required capacity

Main features

- Scroll compressors
- Axial fans statically and dynamically balanced
- Airside heat exchanger high efficiency finned coils with seamless copper tubes expanded into corrugated aluminum
- Waterside plate heat exchanger with differential pressure switch and antifreeze protection electric heater
- Condensing and evaporating pressure control with variable fans speed modulation
- Thermostatic expansion valve
- Casing and panels in painted galvanized steel

Options

- Partial or total heat recovery
- Low noise or super low noise versions
- Hydraulic kits
- Electronic expansion valve
- Power factor correction
- Low ambient temperature kit
- High pressure 100 Pa fans

Accessories

- Remote display
- Communication card RS485
- Signal amplification card
- Flow switch
- Automatic water filling
- Water strainer
- Water gauges
- Rubber or spring anti-vibration mounts

Controls

- Microprocessor-based controller to manage unit on/off mode, operating mode setting, parameters setting, and error code display

CGAX

Air-cooled scroll chiller

Customer benefits

The best value chiller thanks to:

- Low energy consumption: superior part load efficiency (ESEER)
- Silent operation: discreet, even in the most sound sensitive applications
- Unique feature: efficiency maintained when sound decreases
- Compact design: easier jobsite integration
- Reliability: main components designed and manufactured by Trane
- User-friendly control interface and interoperability with building automation systems
- Reduced refrigerant charge

Main features

- Compact design: reduced footprint and low profile design
- High quality finish
- One part load optimized efficiency level
- Two acoustic packages: SN, LN with no loss of efficiency
- Single and/or dual circuit offering
- Microchannel condenser coils
- Wide operating map: airside and waterside

Options

- Various integrated hydraulic modules: single/dual pump, low/high head pressure
- Buffer tank for reliable and smooth operation
- Low temperature process cooling (<4°C)
- Low ambient operation (-18°C)
- E-coated condenser coil
- Partial heat recovery (PHR)
- External protection grill
- High efficiency version (HE)
- Smart Flow Control (Variable-Primary Flow)
- High external static pressure (HESP)
- Smart Plant Control
- Supplemental heat
- New software minor release (R1.4004)

Accessories

- Elastomeric isolators

Controls

- New Trane light commercial controller
- Standard 6 navigation button LCD display
- Optional deluxe display
 - Easy to read 7-inch color touchscreen display
 - Industry leading algorithms
 - Open protocol design
 - Adaptive control
- SmartCom interface: LonTalk®, Modbus®, BACnet® communication capabilities

CGCL

Indoor air-cooled scroll chiller

Customer benefits

- Ideal for installation in existing buildings, with limited roof or external surface available
- No sound radiation outside of technical room
- Possibility of heat reclaim
- Minimum maintenance requirements

Main features

- Scroll compressors
 - Hermetic, high efficiency, low vibration, low sound level
 - Full internal protections, internal temperature and bypass valve
- External sheet metal parts are galvanized and finished with powder paint RAL 9002
- Access panels are quickly removable using a square key
- Vertical or horizontal condenser fan discharge
- Compact - fits through standard 860 mm door width (except size 500 and 600)
- Up to 500 Pa total static pressure at the fan

Options

- Phase and unbalance detection
- Control of the condenser leaving water temperature
- Evaporator water pump command - single or double
- External linear reset, auxiliary and external water setpoint
- Low ambient operation (-10°C)
- Ice making and compressor kW limiting
- Compressor sound attenuating jacket
- High and low pressure gauges
- Four programmable relays for remote unit status
- Water filter
- Filter box fitted with A150/AR300/M8 filters
- Hydraulic module - for information, contact your local sales office

Tracer™ CH530 Control

Adaptive Control™ microprocessor featuring:

- Easy-to-use operator interface panel
- Ice-making card (optional)
- LonTalk® or Modbus® communication capabilities (optional)
- Alarm indicator programmable relays (optional)
- Leaving condenser water temperature control (optional)

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

(1) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient air temperature

(2) At Eurovent conditions: water 12/7°C; air 35°C - according to EN 14511-2013.

(3) At 300 Pa ESP

CGCM

Indoor air-cooled scroll chiller

Customer benefits

- Compact dimensions allow for flexible installations in both new and existing buildings
- Maintenance operations are easy thanks to the location of the components
- Excellent acoustic comfort levels
- Digital Defrost is a self-adaptive defrosting system able to intervene only in case of a consistent thickness formation of ice on the coils' fins
- Dynamic Logic Control manages the differential of the inlet water temperature on the basis of the speed of its variation. Thanks to the DLC the number of the compressor starts decreases ensuring economic and energy savings.
- Dynamic Set Point function allows changing the setpoint simultaneously to always achieve the conditions of best comfort and maximum energy savings.

Main features

- Hermetic scroll compressors, low vibration and low sound level
- High efficiency plug fan for indoor installation with ducted air intake and discharge. Optional EC plug fan for increased external static pressure up to 400 Pa.
- Waterside plate heat exchanger with differential pressure switch and antifreeze protection electric heater
- Airside heat exchanger high efficiency finned coils with seamless copper tubes expanded into corrugated aluminum
- Horizontal or vertical air flow
- Casing and panels in galvanized and painted steel

Options

- Partial heat recovery/total heat recovery
- Compressors sound jackets
- Soft - starter
- Serial communication card RS 485
- Electronic expansion valve
- Power factor correction to cosphi = 0.91
- Automatic circuit breakers
- Numbered wires
- Over/under voltage + phase failure protection relay
- Electronically Commutated (EC) fans for improved capacity modulation and energy savings
- Epoxy coated condensing coils
- Pre-painted condensing coils
- Copper/copper condensing coils
- Tinned copper condensing coils
- Condensing control with variable fan speed modulation with inverter for operation down to +10°C outdoor air temperature

Accessories

- Remote display
- Flow switch
- Automatic water filling
- Water strainer
- Water or gas gauges
- Rubber or spring anti-vibration mounts

Controls

- Microprocessor-based controller to manage unit on/off mode, operating mode setting and parameters setting

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

(1) Operation down to +10°C possible, see options

(2) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient temperature according to EN 14511-2013.

(3) At Eurovent conditions, with 1pW reference sound power, according to ISO9614

(4) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p = L_w - 10 \log S$. This is an averaged value considering the unit as a paralelopedic box with five exposed face areas.

CGAM

Air-cooled scroll chiller

Customer benefits

- Life cycle effectiveness
- Efficiency and sound level without compromise
- All year round operation
- Extreme reliability and durability
- Wide application flexibility for comfort and process applications to fit the exact requirements
- Ease of installation and serviceability

Main features

- 2 efficiency levels: high or standard
- 3 acoustic versions: standard, low noise or comprehensive acoustic package treatment
- High efficiency scroll compressors
- Trane design low sound level fans mounted on hinges
- Electronic expansion valve
- Brazed plates heat exchangers
- Disconnect switch/transformer
- Water strainer and flow switch
- Powder coated components

Options

- Integrated hydraulic module with or without buffer tank
- Single or double pump package
- Variable frequency drive for pump flow rate adjustment
- Freeze protection control
- Black epoxy condenser coil coating
- Architectural louvered panels

Accessories

- Neoprene isolators
- Grooved pipe connection kit

Tracer™ CH530 Control

Adaptive Control™ microprocessor featuring:

- Easy-to-use operator interface panel
- External auto/stop
- External interlock
- Chilled water pump control
- Ice-making card (optional)
- Chilled water and current-limit remote setpoint card (optional)
- LonTalk®, Modbus®, BACnet® communication capabilities

Energy saving options

- Total heat recovery with up to 80% recovery
- Partial heat recovery (desuperheater)

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

(1) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient air temperature

(2) At 40/45°C entering/leaving water temperature

CGWH - CCUH

Water-cooled packaged and condenserless scroll chillers

Customer benefits

- High performance chiller
- Indoor installation: easy maintenance
- Minimum maintenance requirements

Range description

CGWH: packaged chiller

CCUH: condenserless chiller

Main features

- High efficiency hermetic scroll compressors with low vibration and sound levels and full internal overheating protection
- External sheet metal parts are galvanized and finished with powder paint RAL 9002
- Access panels are quickly removable using a square key
- Designed for indoor installation
- Maximum condenser leaving water temperature: 50°C
- 380, 400 and 415V power voltage
- Phase and unbalance detection
- 400/220V transformer for the control

Options

- Compressor sound attenuating jackets
- High and low pressure gauges
- Evaporator water pump command - single or double
- Water filter
- Hydraulic module - for information, contact your local sales office

Tracer™ CH530 Control

Adaptive Control™ microprocessor-based control featuring:

- Easy-to-use operator interface
- External linear reset, auxiliary and external water setpoint
- Compressor kW limiting (optional)
- Alarm indicator programmable relays (options)
- Ice making controls (optional)
- LonTalk® or Modbus® communication interface (optional)
- Leaving condenser water temperature control (optional)

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

CGWN - CCUN

Water-cooled packaged and condenserless scroll chillers

Customer benefits

- Compact chiller with packaged hydraulic module (available as an option) for easier and faster installation
- Wide application flexibility for comfort and process applications: fits your exact requirements
- State of the art control to guarantee superior dependability: lower cost of ownership

Range description

CGWN: packaged chiller

CCUN: condenserless chiller

Main features

- High efficiency hermetic scroll compressors with low vibration and sound levels and full internal overheating protections
- External sheet metal parts are galvanized and finished with powder paint RAL 9002
- Access panels are quickly removable using a square key and mounted handles
- Designed for indoor and outdoor installation
- Maximum condenser leaving water temperature: 60°C (R410A)
- 380, 400 and 415V power voltage
- 400/110V transformer for the control
- Phase & unbalanced detection

Options

- High efficiency version
- Soft starter
- Evaporator + water pump command - single or double
- Condenser + water pump command - single or double
- Compressor sound attenuating jackets
- High and low pressure gauges
- Hydraulic module including:
 - Single or dual evaporator pump including water filter and pressure tabs
 - Speed inverter condenser pumps including flow control, condenser return and leaving water temperature
 - Combinations of hydraulic modules available: evaporator only, condenser only or both

Tracer™ CH530 Control

Adaptive Control™ microprocessor-based control featuring:

- Easy-to-use operator interface
- External linear reset, auxiliary and external water setpoint
- Compressor kW limiting (optional)
- Alarm indicator programmable relays (options)
- Ice making controls (optional)
- LonTalk®, Modbus®, BACnet® communication interface (optional)
- Leaving condenser water temperature control (optional)

CGAF

Air-cooled scroll chiller Sintesis™ Advantage

Customer benefits

- Low energy consumption
- Silent operation
- Wide application flexibility for comfort and process
- User-friendly control interface and interoperability with building automation systems
- Reduced refrigerant charge

Main features

- Three efficiency levels: Standard efficiency (SE), High efficiency (HE), Extra high efficiency (XE)
- Three acoustic packages: Standard noise (SN), Low noise (LN), Extra low noise (XLN)
- Electronically commutated fans
- Variable speed drive
- Microchannel condenser coil
- Free cooling

Options

- Pumps and water tanks fully integrated into design
- Total and partial heat recovery
- High ambient operation (up to 52 °C)
- Low ambient operation (down to -20 °C)

Controls

- Ultimate control: Trane UC800
 - Easy to read 7-inch color touchscreen display
 - Industry leading algorithms
 - Open protocol design
 - Adaptive control
- Rapid restart
- SmartCom interface: LonTalk, Modbus, BACnet communication capabilities
- Energy metering

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

RTAD

Air-cooled helical-rotary chiller Series R™

Chillers

Customer benefits

- Reliability: Trane helical-rotary compressor with only 3 moving parts
- Ease of installation: wide choice of hydraulic modules

Main features

- Competitive physical footprint
- Single power connection
- Low sound levels
- Star-delta starter
- Exact load matching
- Application flexibility

Options

- High ambient operation (up to 52°C)
- Low ambient operation (down to -18°C)
- Low noise version equipped with low-speed fans and compressor sound attenuating
- High efficiency version
- Power disconnect switch
- Condenser protection or complete unit protection
- Night noise setback to reduce sound levels at night
- High and low pressure gauges
- Hydraulic module - single or dual pump with water strainer
- 60 Hz unit

Accessories

- Neoprene isolators
- Grooved pipe connection kit
- Flow switch

UCM-CLD Control

Adaptive Control™ microprocessor featuring:

- Unit control module with clear language display
- External auto/stop
- External interlock
- Chilled water pump control
- Alarm indication contacts
- Ice-making card (optional)
- LonTalk® or Modbus® communication capabilities
- Chilled water and current limit remote setpoint card (optional)

Energy saving options

- High efficiency version, heat recovery, free cooling

(1) With low and high ambient temperature option.

(2) With 3 pass evaporator.

(3) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient air temperature.

(4) At Eurovent conditions, with 1pW reference sound power, according to ISO9614.

(5) Dimensions for standard efficiency model.

(6) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p=L_w-10\log S$. This is an averaged value considering the unit as a paralelopiped box with five exposed face areas.

RTAC

Air-cooled helical-rotary chiller Series R™

Chillers

Customer benefits

- Reliability: Trane helical-rotary compressor with only 3 moving parts
- Efficiency: 3 efficiency levels, to fit your requirements
- Certified Eurovent class A

Main features

- Competitive physical footprint
- Single power connection
- Exact load matching
- Low sound levels
- Falling film evaporator - high COP and reduced refrigerant charge
- Factory-mounted star-delta starter panel
- Close spacing installation - 1.2 m side clearances

Options

- High ambient operation (up to 52°C)
- Low ambient operation (down to -18°C)
- Low noise version equipped with low-speed fans and compressor sound attenuating enclosure
- High efficiency version
- Power disconnect switch
- Night noise setback to reduce sound levels at night
- Unit edge grooved pipe connections
- Extra-pass and specific tubes for low water temperature applications (down to -12°C)
- Black epoxy-coated aluminium fins for corrosive environments

- Copper fins
- Condenser protection or complete unit protection
- High and low pressure gauges

Accessories

- Neoprene isolators
- Grooved pipe connection kit
- Flow switch

Tracer™ CH530 Control

Adaptive Control™ microprocessor featuring:

- Easy-to-use operator interface panel
- External auto/stop
- External interlock
- Chilled water pump control
- Ice-making card (optional)
- Chilled water and current-limit remote setpoint card (optional)

Energy saving options

- High efficiency and extra high efficiency versions

(1) With low and high ambient temperature option.

(2) With 3 pass evaporator.

(3) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient air temperature.

(4) At Eurovent conditions, with 1pW reference sound power, according to ISO9614.

(5) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p = L_w - 10 \log S$. This is an averaged value considering the unit as a parallelepiped box with five exposed face areas.

RTAF

Air-cooled helical-rotary chiller

Chillers

Customer benefits

- Probably the lowest Total Cost of Ownership thanks to:
- Low energy consumption: high full (EER) and part (ESEER) load efficiencies
 - Silent operation: discreet, even in the most sound sensitive applications
 - Unique feature: efficiency increases when sound decreases
 - Reliability: main components designed and manufactured by Trane
 - User-friendly control interface and interoperability with building automation systems
 - Reduced refrigerant charge

Main features

- 5 efficiency levels: SE, HE, XE, HSE and HSS with increasing part load (ESEER) efficiencies
- 3 acoustic packages: SN, LN with no loss of efficiency; XLN with improved efficiency
- Trane Adaptive Frequency™ Drive on compressors on HSE/HSS versions
- Electronically Commutated condenser fans on XE, HSE and HSS versions
- New Trane patented flooded evaporator CHIL (Compact - High performance - Integrated design - Low charge)
- Microchannel condenser coils
- Wide operating map: airside and waterside

Options

- Integrated water pump: dual pump low or high head pressure
- Partial heat recovery
- Low temperature process cooling (<4°C)
- Ice storage
- High ambient operation (55°C)
- Low ambient operation (-18°C)
- E-coated condenser coil
- Optiplant: unit sequencer

Accessories

- Flow-switch
- Elastomeric isolators

Controls

- Ultimate control: Trane UC800
 - Easy to read 7-inch color touchscreen display
 - Industry leading algorithms
 - Open protocol design
 - Adaptive control
- Feedforward adaptive control
- Softloading (HSE/HSS)
- Rapid restart
- SmartCom interface: LonTalk®, Modbus®, BACnet® communication capabilities
- Energy metering

- (3) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient temperature according to EN 14511-2013.
- (4) At Eurovent conditions, with 1pW reference sound power, according to ISO9614
- (5) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p=L_w-10\log S$. This is an averaged value considering the unit as a parallelepiped box with five exposed face areas.

Operating outdoor air temperature range (min./max.) (1)	(°C)	-18 / +55°C
Leaving water temperature range (min./max.) (2)	(°C)	-12 / 20°C
Power supply	(V/Ph/Hz)	400/3/50

- (1) With low ambient temperature option
 (2) With process cooling option
 (3) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient temperature according to EN 14511-2013.
 (4) At Eurovent conditions, with 1pW reference sound power, according to ISO9614
 (5) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p=L_w-10\log S$. This is an averaged value considering the unit as a parallelepiped box with five exposed face areas.

Operating outdoor air temperature range (min./max.) (1)	(°C)	-18 / +55°C
Leaving water temperature range (min./max.) (2)	(°C)	-12 / 20°C
Power supply	(V/Ph/Hz)	400/3/50

- (1) With low ambient temperature option
 (2) With process cooling option
 (3) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient temperature according to EN 14511-2013.
 (4) At Eurovent conditions, with 1pW reference sound power, according to ISO9614
 (5) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p=L_w-10\log S$. This is an averaged value considering the unit as a parallelepiped box with five exposed face areas.

Operating outdoor air temperature range (min./max.) (1)	(°C)	-18 / +55°C
Leaving water temperature range (min./max.) (2)	(°C)	-12 / 20°C
Power supply	(V/Ph/Hz)	400/3/50

- (1) With low ambient temperature option
- (2) With process cooling option
- (3) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient temperature according to EN 14511-2013.
- (4) At Eurovent conditions, with 1pW reference sound power, according to ISO9614
- (5) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p=L_w-10\log S$. This is an averaged value considering the unit as a parallelepiped box with five exposed face areas.

Increased savings with RTAF HSE (High Seasonal Efficiency) and HSS (High Seasonal Efficiency Short) versions

- AFD (Adaptive Frequency™ Drive) as standard
- Fewer start-stop cycles
- Increased compressor life
- Reduced start-up current draw

RTAE

Air-cooled helical-rotary chiller Stealth™

Chillers

Customer benefits

- Low cost of ownership: High full (EER) and part load efficiencies (ESEER)
- Silent operation: high level of acoustic comfort.

Main features

- AdaptiSpeed™ Technology: permanent magnet motors powering the compressor and fans
- AFD3 Adaptive Frequency™ Drive – 30% TDD harmonic filtration
- 3 InvisiSound™ acoustic versions: Standard, Superior Sound Package and Ultimate
- New generation efficient water exchanger
- All aluminum condenser coils (aluminum fins and tubes)

Options

- Flow-switch
- Low temperature process cooling (<4°C)
- Ice storage
- High ambient operation (52°C)
- Low ambient operation (-18°C)
- Complete Coat™ epoxy coated condenser coil
- Architectural louvered panels

Accessories

- Elastomeric isolators

Controls

- Ultimate control: Trane UC800
 - Easy to read 7-inch color touchscreen display
 - Industry leading algorithms
 - Open protocol design
 - Adaptive control
- Feedforward adaptive control
- Softloading
- Rapid restart
- Adaptspeed Control
- Variable-Primary Flow (VPF) compatible

The key to every Stealth chiller's low sound levels

Variable-speed condenser coil fans help reduce sound output.

InvisiSound Ultimate Sound Package

Patented compressor enclosure and metallic bellows absorb vibrations from normal compressor operation.

RTWD - RTUD

Water-cooled packaged and condenserless helical-rotary chiller Series R™

Chillers

Customer benefits

High performance chiller based on:

- Falling film evaporator: higher performances with lower refrigerant charge
- State-of-the-art control to guarantee superior dependability and low cost of ownership
- Optional Trane Adaptive Frequency™ Drive (AFD) for part load efficiency enhancement

Range description

RTWD: packaged chiller

RTUD: condenserless chiller

Main features

- Low-speed, direct-drive semi-hermetic helical rotary compressor featuring only 3 moving parts, suction-gas-cooled motor
- Fully modulating load control (15-100%)
- 3 different levels of efficiency
- Control of the leaving condenser water temperature from CH530
- Maximum condenser temperature 63°C
- Compact physical footprint - fits through standard single-width door
- Bolt-together construction for easy unit disassembly
- Simplified piping - the only piping required is for the evaporator and condenser connections
- Single power connection - reduced wiring costs
- Factory-mounted star-delta starter panel

Tracer™ CH530 Control

Adaptive Control™ microprocessor-based control featuring:

- Easy-to-use operator interface
- Chilled water pump control

Control options:

- Control of the leaving condenser water temperature
- Programmable relays
- Reset of setpoints by analog signal
- Condenser refrigerant pressure output
- LonTalk®, BACnet®, Modbus® communication interfaces

Increased savings with RTWD HSE (High Seasonal Efficiency) version

- AFD (Adaptive Frequency™ Drive) as standard
- Fewer start-stop cycles
- Increased compressor life
- Reduced start-up current draw
- Turning your current RTWD into a top performing chiller is possible thanks to Trane Field Retrofit solution

RTHD^{evo}

Water-cooled packaged helical-rotary chiller Series R™

Customer benefits

Industry leading efficiencies thanks to:

- Falling film evaporator: superior performances with low refrigerant charge
- New Trane control for optimal system reliability and human interface
- Trane helical-rotary compressor - designed to perform, built to last
- Optional Trane Adaptive Frequency™ Drive (AFD) for part load efficiency enhancement

Main features

- 4 efficiency levels: SE, HE, XE and new HSE fitted with Trane AFD with enhanced part load (ESEER) efficiencies
- Low-speed, direct-drive semi-hermetic helical rotary compressor featuring only 3 moving parts, suction-gas-cooled motor
- Fully modulating load control (15-100%)
- Compact physical footprint - fits through standard double-width doors
- Bolt-together construction for easy unit disassembly
- Factory-mounted star-delta starter panel
- Simplified piping - the only piping required is for the evaporator and condenser grooved pipe connections
- Single power connection - reduced wiring costs

Options

- Insulation on evaporator, water boxes, suction line, motor housing
- Fused or non-fused power disconnect switch
- Under/over voltage protection

Accessories

- Outside air temperature sensor
- Condenser valves

Control

- Ultimate control: UC800
- Easy to read 7-inch color touchscreen display
- Industry leading algorithms
- Open protocol design
- Adaptive control
- Feedforward adaptive control
- Softloading (HSE)
- Rapid Restart
- SmartCom interface: LonTalk®, BACnet®, Modbus® communication interfaces
- Energy metering

Increased savings with RTHD HSE (High Seasonal Efficiency) version

- AFD (Adaptive Frequency™ Drive) as standard
- Fewer start-stop cycles
- Increased compressor life
- Reduced start-up current draw
- Turning your current RTHD into a top performing chiller is possible thanks to Trane Field Retrofit solution

RTWF

Water-cooled packaged helical-rotary chiller XStream™

Chillers

Customer benefits

- Extended and unmatched capacities
- High efficiencies
- Reliability : Trane helical-rotary compressor and double refrigerant circuit
- State-of-the-art control to guarantee superior dependability and low cost of ownership
- Optional Trane Adaptive Frequency™ Drive (AFD) for part load efficiency enhancement.

Main features

- 3 different levels of efficiency (SE – HE – HSE)
- Dual circuit and multiple compressors
- Low-speed, direct-drive semi-hermetic helical rotary compressor, suction-gas-cooled motor
- Trane patented CHIL Evaporator
- Fully modulating load control (15 – 100%)
- Adaptive Control™ microprocessor system enhances chiller by providing the latest chiller control technology
- Variable Primary Flow full compatibility

Options

- High temperature Condenser leaving water temperature up to 68°C
- Brine applications down to -12°C leaving water
- Ice Making
- Right hand or Left hand connections

Accessories

- Flow Switch
- Anti-vibration accessories : neoprene isolators

Controls

- Ultimate control: UC800
- Easy to read 7-inch color touchscreen display
- Industry leading algorithms
- Open protocol design
- Adaptive control
- Variable Primary Flow control at evaporator and/or condenser
- Feedforward Adaptive control
- Softloading (HSE)
- Rapid Restart
- SmartCom interface: BACnet® MSTP, BACnet® IP, BACnet® RTU, Modbus® RTU and LonTalk® communication interfaces
- Master/Slave operation
- Energy metering

(1) Evaporator 12/7°C, condenser water temperature 30/35°C according to EN14511:2013. Rated in accordance with AHRI Standard 550/590, based on TOPSS version 192

(2) At full load and in accordance with ISO9614

(3) Global Sound Pressure level at 10m

RTHF

Water-cooled packaged helical-rotary chiller XStream™

Customer benefits

- Extended and unmatched capacities
- High efficiencies
- Reliability : Trane helical-rotary compressor and double refrigerant circuit
- State-of-the-art control to guarantee superior dependability and low cost of ownership
- Optional Trane Adaptive Frequency™ Drive (AFD) for part load efficiency enhancement.

Main features

- 2 different levels of efficiency (XE – HSE)
- Dual circuit and Dual compressor
- Low-speed, direct-drive semi-hermetic helical rotary compressor, suction-gas-cooled motor
- Trane patented CHIL Evaporator
- Fully modulating load control (15 – 100%)
- Adaptive Control™ microprocessor system enhances chiller by providing the latest chiller control technology
- Variable Primary Flow full compatibility

Options

- Brine applications down to -12°C leaving water
- Ice Making
- Right hand or Left hand connections
- Dual Power Connection

Accessories

- Flow Switch
- Anti-vibration accessories : neoprene isolators

Controls

- Ultimate control: UC800
 - Easy to read 7-inch color touchscreen display
 - Industry leading algorithms
 - Open protocol design
 - Adaptive control
- Variable Primary Flow control at evaporator and/or condenser
- Feedforward Adaptive control
- Softloading (HSE)
- Rapid Restart
- SmartCom interface: BACnet® MSTP, BACnet® IP, BACnet® RTU, Modbus® RTU and LonTalk® communication interfaces
- Master/Slave operation
- Energy metering

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

Condenser leaving water temperature (min/max)	(°C)	10 / 46*
Evaporator leaving water temperature (min/max)	(°C)	-12 / 20
Power supply	(V/Ph/Hz)	400 / 3 / 50

GVAF

Air-cooled chiller with high speed centrifugal compressor
Sintesis™ Excellent

Customer benefits

- Market-leading Energy Efficiency Ratio (EER) and European Seasonal Energy Efficiency Ratio (ESEER) with lower sound levels.
- R1234ze which has a GWP value of less than one to exceed current F-Gas legislation requirements and help customers reduce their carbon dioxide (CO₂) emissions
- Silent operation : discreet, even in the most sound sensitive applications without any drop on capacity or efficiency
- Significant reduced high in-rush current at start up
- Smart controls and user-friendly touchscreen interface
- No compromise: You can count on Trane's legendary reliability.
- Take the advantage of low ambient conditions
- Reduced refrigerant charge
- Easy operation thanks to smart controls and a user-friendly touchscreen interface

Main features

- 3 efficiency levels: X, XP, XPG
- Two refrigerant alternatives R134a and R1234ze with GWP<1
- Two acoustic packages: Low noise, extra low noise and night noise set back
- High speed oil-free centrifugal compressor using Magnetic bearings with integrated variable frequency drive and soft starter module
- Electronically commutated fan motors to reach higher part load efficiencies with lower sound levels

- Trane patented flooded evaporator
- Micro-channel condenser coils
- Double refrigerant circuit
- Economizer circuit EMC filter to avoid harmonic transfer to compressor

Options

- E-coated condenser coil
- Partial and total free-cooling
- Hydraulic module
- Constant speed pump – Variable frequency drive adjustment
- Variable speed pump – Constant differential pressure (DP)
- Integrated evaporator turbulators
- High performance insulated evaporator

Accessories

- Elastomeric isolators

Controls

- Ultimate control: Trane UC800
 - Easy to read 7-inch color touchscreen display
 - Industry leading algorithms
 - Open protocol design
 - Adaptive control
 - Rapid restart
- SmartCom interface: LonTalk, Modbus, BACnet communication capabilities
- Energy metering

CVGF

Water-cooled centrifugal
packaged chiller
CenTraVac™

Chillers

Customer benefits

Chiller providing excellent performance thanks to:

- Hermetic, multistage Trane centrifugal compressor offering both wide operating range and extended part load capability- minimum maintenance requirements- no extra ventilation required to cool compressor motor
- State of the art control to guarantee superior dependability: low cost of ownership

Main features

- Hermetic two-stage centrifugal compressor-motor assembly with integral lubrication system and economizer cycle
- Liquid cooled hermetic induction motor
- Advanced motor protection
- Hundreds of evaporator-condenser-compressor combinations available, permitting precise tailoring to system requirements
- Single power connection - reduce wiring costs
- Factory-mounted star-delta starter panel
- Prewired instrument and control panel

Options

- Solid-state starters
- Marine waterboxes (10.5 or 21 bar) evaporator and condenser
- Cold parts thermal insulation

Accessories

- Flanged adaptors
- Flow switch(es)

Tracer™ AdaptiView Control

- Touchscreen color display, allowing intuitive navigation through reports and graphs
- Adaptive Control™ logic
- LonTalk®, BACnet®, Modbus® communication interfaces (optional)

CVHH - CDHH

Water-cooled centrifugal
packaged chillers
Series E™ CenTraVac™ chiller

R1233zd(E) refrigerant

Chillers

Customer benefits

- Reliability
- Efficiency
- Low emissions

Range description

- CVHH = three-stage (50 Hz) or two-stage (60 Hz) single compressor
 - 4500 to 7000 kW – 50 Hz
 - 3000 to 7000 kW – 60 Hz
- CDHH = three-stage (50 Hz) or two-stage (60 Hz) dual compressor
 - 9500 to 14000 kW – 50 Hz
 - 6300 to 14000 kW – 60 Hz

Main features

- Next generation, low GWP refrigerant R1233zd(E)
- Direct drive multistage compressors
- Semi-hermetic compressor design
- Economizer
- Rapid restart after power failure

Options

As with all CenTraVac™ chillers, selection options result in a unit built to your specifications. From energy saving options to the enhanced electrical package to a variety of low and medium voltage options, your Trane chiller is customized for you.

- Low voltage (<600V) options include unit and remote-mounted wye delta or solid state starters, or a unit-mounted Adaptive Frequency™ drive.
- Medium voltage (3.3-6.6kV or 10-11kV) options include unit and remote-mounted across-the-line, primary reactor or auto transformer starters, or a remote-mounted Adaptive Frequency™ Drive.

Energy-saving options include:

- Heat pump capabilities up to 60°C leaving condenser water
- Full heat recovery (full heat recovery double bundle heat exchanger)
- Auxiliary condenser (partial heat recovery)
- Thermal storage (down to -7.8°C)
- Free cooling

Controls

- Tracer AdaptiView™ Controls
 - Providing the intelligence behind CenTraVac Chillers, Trane Adaptive Control™ strategies respond to a variety of conditions to maintain efficient chiller plant operation for all applications, with patented control algorithms that maximize performance in variable primary flow systems.
 - The open protocol design works with any building automation system without the need for gateways (BACnet®, Modbus RTU and LonTalk®)

Trane Centrifugal Chiller Product Portfolio

Heat Rejection Systems

Chillers

Trane customized solutions

To complete your chiller system, Trane proposes different types of heat rejection solutions. You clearly benefit – from the design phase to installation of your system – when you partner with a single-source supplier.

Air-cooled condensers

- Horizontal or V-type design
- To operate with Trane model CCUH, CCUN or RTUD condenserless chillers, either with R407C, R410A or R134a depending on the type
- Available with various fan-speed combinations to meet the most severe acoustical requirements
- Including different levels of unit mounted control options to optimize the performances of the entire system

Dry coolers

- Horizontal or V-type design
- To operate with Trane model CGWH, CGWN, RTWD or RTHD chillers
- Available with various fan-speed combinations to meet the most severe acoustical requirements
- Including different levels of unit mounted control options to optimize the performances of the entire system

Cooling towers

- Open or closed type
- With axial or centrifugal fans
- To operate with Trane model CGWH, CGWN, RTWD, RTHD, CVGF or CVHH/CDHH chillers
- Available with different levels of acoustic packages to meet the most severe acoustical environments

Contact your local Trane Sales Office to support you in the selection of the most appropriate solution for your application.

Notes

TRANE®

Heat Pumps

In response to the growing demand for energy saving systems, and to reassert our position as a key heating systems provider through the use of the most energy efficient technology available and the continuous design of sustainable solutions, Trane is proud to offer a full range of air-to-water and water-to-water heat pumps.

CXA

Reversible air-to-water scroll heat pump

Customer benefits

- Digital Defrost is a self-adaptive defrosting system able to intervene only in case of a consistent thickness formation of ice on the coils' fins
- Dynamic Logic Control manages the differential of the inlet water temperature on the basis of the speed of its variation. Thanks to the DLC the number of the compressor starts decreases ensuring economic and energy savings.
- Dynamic Set Point function allows changing the setpoint simultaneously to always achieve the best comfort conditions and maximum energy savings.

Main features

- Scroll compressor
- Axial fans propeller type
- Airside heat exchanger with seamless copper tubes and aluminium fins
- Waterside heat exchanger steel brazed plate fitted with differential pressure switch and antifreeze protection electric heater
- Low ambient condensing pressure control with variable fan speed modulation
- Electrical panel with main switch
- Casing and panels in galvanized and painted steel

Options

- Low ambient temperature kit (down to -10°C) in heating mode
- Low water temperature kit (down to -6°C)
- Hydraulic module with water pump
- Hydraulic module with water pump and water tank (delivered separately)
- Compressors sound jackets
- Soft - starter
- Control panel electric heater with thermostat
- Phase failure protection relay
- Epoxy coated condensing coils

Accessories

- Remote control panel
- Communication card RS485
- Flow switch
- Automatic water filling
- Water strainer
- Water gauges
- Rubber anti-vibration mounts

Control

- Microprocessor-based controller to manage unit on/off mode, operating mode setting, parameters setting, and error code display

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

		Cooling	Heating

(1) In parentheses: With low ambient temperature option

(2) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient temperature according to EN 14511-2013.

(3) Outdoor temperature 7°C 90% R.H. - hot water temperature in/out 40/45°C

(4) At Eurovent conditions, with 1pW reference sound power, according to ISO9614

(5) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p=L_w-10\log S$.

This is an averaged value considering the unit as a parallelopipedic box with five exposed face areas.

(6) Excluding water tank

Flex

Reversible air-to-water modular scroll heat pump

Customer benefits

- Ultimate flexibility: up to 12 units can be combined into one system in order to reach the required capacity

Main features

- Scroll compressors
- Axial fans statically and dynamically balanced
- Airside heat exchanger high efficiency finned coils with seamless copper tubes expanded into corrugated aluminum
- Waterside plate heat exchanger with differential pressure switch and antifreeze protection electric heater
- Condensing and evaporating pressure control with variable fans speed modulation.
- Thermostatic expansion valve.
- Casing and panels in painted galvanized steel

Options

- Partial or total heat recovery
- Low noise or super low noise versions
- Hydraulic kits
- Electronic expansion valve
- Power factor correction
- Low ambient temperature kit
- High pressure 100 Pa fans

Accessories

- Remote display
- Communication card RS485
- Signal amplification card
- Flow switch
- Automatic water filling
- Water strainer
- Water gauges
- Rubber or spring anti-vibration mounts

Controls

- Microprocessor-based controller to manage unit on/off mode, operating mode setting, parameters setting, and error code display

CXAX

Reversible air-to-water
scroll heat pump

Customer benefits

The best value chiller thanks to:

- Reversible operation: cooling or heating
- Low energy consumption: superior part load efficiency ESEER and SCOP
- Silent operation: discreet, even in the most sound sensitive applications
- Unique!: efficiency maintained when sound decreases
- Compact design: easier jobsite integration
- Reliability: main components designed and manufactured by Trane
- User friendly control interface and interoperability with building automation systems

Main features

- Compact design: reduced footprint and low profile design
- High quality finish
- Heating all year round: down to -15°C ambient and up to 60°C leaving water temperature
- One part load optimized efficiency level
- Two acoustic packages: SN, LN with no loss of efficiency
- Single and/or dual circuit offering

Options

- Various integrated hydraulic modules: single/dual pump, low/high head pressure
- Buffer tank for reliable and smooth operation
- Low temperature process cooling (<4°C)
- Low ambient operation (-10°C)
- Epoxy condenser coating

Accessories

- Elastomeric isolators

Control

- Trane light commercial controller
- Standard 6 navigation button LCD display
- Optional deluxe display
 - Easy to read 7-inch color touchscreen display
 - Industry leading algorithms
 - Open protocol design
 - Adaptive control
- SmartCom interface: LonTalk®, Modbus®, BACnet® communication capabilities

(6) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p=L_w-10\log S$.

This is an averaged value considering the unit as a parallelopipedic box with five exposed face areas.

CXCM

Indoor air-cooled scroll heat pump

Customer benefits

- Compact dimensions allow for flexible installations in both new and existing buildings
- Maintenance operations are easy thanks to the location of the components
- Excellent acoustic comfort levels
- Digital Defrost is a self-adaptive defrosting system able to intervene only in case of a consistent thickness formation of ice on the coils' fins
- Dynamic Logic Control manages the differential of the inlet water temperature on the basis of the speed of its variation. Thanks to the DLC the number of the compressor starts decreases ensuring economic and energy savings.
- Dynamic Set Point function allows changing the setpoint simultaneously to always achieve the conditions of best comfort and maximum energy savings.

Main features

- Hermetic scroll compressors, low vibration and low sound level
- High efficiency plug fan for indoor installation with ducted air intake and discharge. Optional EC plug fan for increased external static pressure up to 400 Pa.
- Water side plate heat exchanger with differential pressure switch and antifreeze protection electric heater
- Air side heat exchanger high efficiency finned coils with seamless copper tubes expanded into corrugated aluminum
- Thermostatic expansion valve
- Casing and panels in galvanized and painted steel
- Horizontal or vertical air flow

Options

- Compressors sound jackets
- Soft - starter
- Serial communication card RS 485
- Electronic expansion valve
- Power factor correction to cosphi = 0.91
- Automatic circuit breakers
- Numbered wires
- Over/under voltage + phase failure protection relay
- Electronically Commutated (EC) fans for improved capacity modulation and energy savings
- Epoxy coated condensing coils
- Pre-painted condensing coils
- Copper/copper condensing coils
- Tinned copper condensing coils
- Condensing control with variable fan speed modulation with inverter for operation down to +10°C outdoor air temperature

Accessories

- Remote display
- Flow switch
- Automatic water filling
- Water strainer
- Water or gas gauges
- Rubber or spring anti-vibration mounts

Control

- Microprocessor-based controller to manage unit on/off mode, operating mode setting and parameters setting

(1) Operation down to +10°C possible, see options

(2) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient temperature according to EN 14511-2013.

(3) At Eurovent conditions, with 1pW reference sound power, according to ISO9614

(4) Average at 10 meters in a free field. This is a non-contractual data, calculated from the above certified sound power level according to the formula $L_p = L_w - 10 \log S$. This is an averaged value considering the unit as a parallelopipedic box with five exposed face areas.

CXAM

Reversible air-to-water scroll heat pump

Customer benefits

- Life cycle effectiveness
- Efficiency and sound level without compromise
- All year round operation
- Extreme reliability and durability
- Wide application flexibility for comfort and process applications to fit the exact requirements
- Ease of installation and serviceability

Main features

- 2 efficiency levels: high or standard
- 3 acoustic versions: standard, low noise or comprehensive acoustic package treatment
- High efficiency scroll compressors
- Hot water leaving temperature up to +55°C
- Patented refrigerant circuit
- Trane design low sound level fans mounted on hinges
- Electronic expansion valve
- Brazed plates heat exchangers
- Powder coated components
- Disconnect switch/transformer
- Water strainer and flow switch

Options

- Integrated hydraulic module with or without buffer tank
- Single or double pump package
- Variable frequency drive for pump flow rate adjustment
- Freeze protection control
- Black epoxy condenser coil coating
- Architectural louvered panels, access guards

Accessories

- Neoprene isolators
- Grooved pipe connection kit

Tracer™ CH530 Control

Adaptive Control™ microprocessor featuring:

- Easy-to-use operator interface panel
- Smart defrost management
- External auto/stop
- External interlock
- Chilled water pump control
- Ice-making card (optional)
- Chilled water and current-limit remote setpoint card (optional)
- LonTalk®, Modbus®, BACnet® communication capabilities

Energy saving options

- Partial heat recovery (desuperheater)

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

Start-up amps	(A)	266.0	322.0	347.3	403.8	429.4	498.8

(1) With low ambient option

(2) With process cooling options

(3) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient air temperature

(4) At Eurovent conditions: 40/45°C entering/leaving water temperature and DB/WB 7°C/6°C ambient temperature according to EN 14511-2013.

(5) At Eurovent conditions: 40/45°C entering/leaving water temperature and 35°C ambient air temperature

(6) At Eurovent conditions, with 1pW reference sound power, according to ISO9614

(7) At 10 m in free field, calculated from the above sound power level according to the formula $L_p = L_w - 10 \log S$

Save energy with total or partial heat recovery factory-fitted options on CXAM

- Reduced operating cost
- Preheat sanitary water (for commercial buildings) or kitchen and laundries water (in hotels and resorts)
- Reduced carbon footprint

Partial heat recovery - model CXAM HE compact

Unit size	Unit power input (1) (kW)	Cooling capacity in cooling (1) (kW)	Heating capacity (2) (kW)	Heat recovered (2) (%)	Maximum hot water temperature (°C)
52	48.3	149.8	39.1	26	60

(1) At Eurovent conditions: 12/7°C entering/leaving water temperature and 35°C ambient air temperature

(2) At 40/45°C entering/leaving water temperature

CXAO

Reversible air-to-water scroll heat pump

LonMARK
SPONSOR

Customer benefits

- Eco-friendly and efficient refrigerant R410A refrigerant and heat exchangers with increased surface area
- Compact overall dimensions allow extremely flexible installations
- Simplified maintenance operations thanks to easy access to components

Main features

- Scroll compressors
- Electronic expansion valves
- Statically and dynamically balanced axial fans
- Shell and tube or plate heat exchanger with differential pressure switch and antifreeze protection (electric heater) on waterside
- High efficiency finned coils (with seamless copper tubes expanded into corrugated aluminium) heat exchangers on airside
- Casing and panels in galvanized and painted steel

Options

- Low ambient temperature kit for operation down to -10°C in heat pump mode
- Condensing control with variable fan speed modulation for operation down to +10°C in cooling mode
- Control panel electric heater with thermostat
- Phase failure protection relay
- Water pumps automatic changeover
- Condensing coil protection grilles

- Gas gauges
- Soft starter
- Pre-painted condensing coils
- Epoxy coated condensing coil fins
- Copper/copper or tinned copper/copper condensing coils

Accessories

- Flow switch
- Automatic water filling
- Water strainer
- Kit flanges
- Victaulic adapter
- Water gauges
- Rubber and/or spring anti-vibration mounts

Controls

- Standard 8 button LCD display
- 32 bit microprocessor with a 4 MB storage memory, real time clock for alarms storage, multi-language control software
- Communication card RS485
- Optional
 - Remote control display
 - LonTalk®, BACnet® communication capabilities

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

Customer benefits

- High performance heat pump
- Compact design
- Indoor installation: easy maintenance
- Minimum maintenance requirements

Main features

- High efficiency hermetic scroll compressors with low vibration and sound levels and full internal overheating protection
- Hot water leaving water temperature up to +50°C
- External sheet metal parts are galvanized and finished with powder paint RAL 9002
- Access panels are quickly removable using a square key
- Designed for indoor installation
- 380, 400 and 415 V power voltage
- Phase and unbalance detection
- 400/220 V transformer for the control

CGWH

Water-to-water scroll heat pump

Options

- Compressor sound attenuating jackets
- High and low pressure gauges
- Evaporator water pump command - single or double
- Water filter
- Hydraulic module - for information, contact your local sales office

Tracer™ CH530 Control

Adaptive Control™ microprocessor-based control featuring:

- Easy to use operator interface
- Leaving hot water temperature control
- External linear reset, auxiliary and external water setpoint
- Compressor kW limiting (optional)
- Alarm indicator programmable relays (optional)
- LonTalk® or Modbus® communication interface (optional)

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

(1) At 40/45°C entering/leaving hot water temperature and 12/7°C entering/leaving evaporator water temperature

(2) With 1pW reference sound power, according to ISO9614

(3) η_s /SCOP as defined in Directive 2009/125/EC of the European Parliament and of the Council with regard to ecodesign requirements for space heaters and combination heaters with P rated <400 kW - COMMISSION REGULATION (EU) No 813/2013 of 2 August 2013: Med. temp. application 10/7°C

Customer benefits

High performance heat pump based on:

- Compact design and packaged hydraulic module (available as an option) for easier and faster installation
- Wide application flexibility for comfort and process applications
- State of the art control to guarantee superior dependability: low cost of ownership

Main features

- High efficiency hermetic scroll compressors with low vibration and sound levels and full internal overheating protections
- Hot water leaving water temperature up to +60°C
- Control of the condenser leaving water temperature
- External sheet metal parts are galvanized and finished with powder paint RAL 9002
- Access panels are quickly removable using a square key and mounted handles
- Designed for indoor and outdoor installation
- Full factory refrigerant and oil charge
- 380, 400 and 415 V power voltage
- 400/110 V transformer for the control
- Phase & unbalanced detection

CGWN

Water-to-water scroll heat pump

Options

- High efficiency version
- Soft starter
- Water pumps command - single or double
- Compressor kW limiting
- Compressor sound attenuating jackets
- High and low pressure gauges
- Hydraulic module including:
 - single or dual evaporator pump including water filter and pressure tabs
 - speed inverter condenser pumps including flow control, water filter and pressure tabs for winter freeze protection
 - combinations of hydraulic modules available: evaporator only, condenser only or both

Tracer™ CH530 Control

Adaptive Control™ microprocessor-based control featuring:

- Easy to use operator interface
- External linear reset, auxiliary and external water setpoint
- Compressor kW limiting (optional)
- Alarm indicator programmable relays (options)
- LonTalk®, BACnet®, or Modbus® communication interface (optional)

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

RTWD

Water-to-water helical-rotary heat pump

Customer benefits

High performance heat pump based on:

- Falling film evaporator: higher performances with lower refrigerant charge
- State-of-the-art control to guarantee superior dependability and low cost of ownership
- Optional Trane Adaptive Frequency™ Drive (AFD) for part load efficiency enhancement

Main features

- Low-speed, direct-drive semi-hermetic helical rotary compressor featuring only 3 moving parts, suction-gas-cooled motor
- Fully modulating load control (15-100%)
- 3 different levels of efficiency
- Control of the hot water leaving water temperature from CH530
- Maximum condenser temperature 63°C
- Compact physical footprint - fits through standard single-width door
- Bolt-together construction for easy unit disassembly
- Single power connection-reduced wiring costs
- Factory-mounted star-delta starter panel

Tracer™ CH530 Control

Adaptive Control™ microprocessor-based control

featuring:

- Easy to use operator interface
 - Water pump control
- Control options:
- Programmable relays
 - Reset of setpoints by analog signal
 - Condenser refrigerant pressure output
 - LonTalk®, BACnet®, Modbus® communication interfaces

RTWF

Water-to-water helical-rotary
heat pump
XStream™

Customer benefits

- Extended and unmatched capacities
- High efficiencies
- Reliability: Trane helical-rotary compressor and double refrigerant circuit
- State-of-the-art control to guarantee superior dependability and low cost of ownership
- Optional Trane Adaptive Frequency™ Drive (AFD) for part load efficiency enhancement.

Main features

- High leaving water temperature up to 68°C
- 3 different levels of efficiency (SE–HE–HSE)
- Dual circuit and multiple compressors
- Low-speed, direct-drive semi-hermetic helical rotary compressor, suction-gas-cooled motor
- Trane patented CHIL evaporator
- Fully modulating load control (15–100%)
- Adaptive Control™ microprocessor system enhances chiller by providing the latest chiller control technology
- Variable Primary Flow full compatibility

Options

- Right hand or left hand connections

Accessories

- Flow switch
- Anti-vibration accessories: neoprene isolators

Controls

- Ultimate control: UC800
 - Easy to read 7-inch color touchscreen display
 - Industry leading algorithms
 - Open protocol design
 - Adaptive control
- Variable Primary Flow control at evaporator and/or condenser
- Feedforward Adaptive control
- Softloading (HSE)
- Rapid Restart
- SmartCom interface: BACnet® MSTP, BACnet® IP, BACnet® RTU, Modbus® RTU and LonTalk® communication interfaces
- Master/Slave operation
- Energy metering

(1) Condenser water temperature 40 / 45°C, according to EN 14511-2013.

(2) Condenser water temperature 47 / 55°C, according to EN 14511-2013.

(3) At full load and in accordance with ISO9614

RTXB

Reversible air-to-water helical-rotary heat pump

Customer benefits

- Eco-friendly, safe and efficient refrigerant R134a
- Compact dimensions allow for flexible installations in both new and existing buildings
- Simplified maintenance operations thanks to easy access to components

Main features

- Helical-rotary compressors
- High efficiency axial fans
- Shell and tube type heat exchangers on water side
- High efficiency finned coils with seamless copper tubes expanded into corrugated aluminium
- Electronic expansion valves
- Galvanized and painted steel casing and panels
- Numbered wires

Options

- Screw compressors with stepless capacity control
- Low Noise version with insulated compressors housing and two speed fan motors. Super Low Noise version with insulated compressors housing, oversized coils and variable fan speed regulation
- Soft starter
- Low ambient temperature kit for operation down to -10°C in heat pump mode
- Condensing control with variable fan speed modulation for operation down to +10°C in cooling mode
- Power factor correction to cos phi 0.91
- Automatic circuit breakers for compressors and/or fans
- Star-Delta starter
- Control panel electric heater with thermostat

- Phase failure protection relay
- Anti-intrusion and/or condensing coil protection grilles
- Gas gauges
- Pre-painted, epoxy coated, copper/copper or tinned copper/copper condensing coils

Accessories

- Flow switch
- Automatic water filling
- Water Victaulic™ kit
- Water strainer
- Water gauges
- Rubber and/or spring anti-vibration mounts

Controls

- Standard 8 button LCD display
- 32 bit microprocessor with a 4MB storage memory, real time clock for alarms storage, multi-language control software
- Communication card RS485
- Optional
 - Remote control display
 - LonTalk®, BACnet® communication capabilities

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

Notes

TRANE®

Multi-pipe Units

The continuous drive to improve energy efficiency of building systems requires an optimal balancing in the demand and supply of both heating and cooling. Trane's multi-pipe units prove to be a sustainable solution for many applications.

Customer benefits

- Simplicity: one unit provides both heating and cooling
- High diversity in air conditioning applications with a **simultaneous** heating and cooling demand
- Optimal use of renewable energy for heating
- Full energy recovery to strongly reduce annual operating costs and carbon emissions
- Autonomously handle all thermal loads while adjusting itself in order to optimize energy efficiency
- Simultaneous heating and cooling capacity control
- Different from a traditional reversible heat pump there are two separate heat exchangers for chilled and hot water production

Range description

CMAB SE/HE: fixed speed scroll compressors

CMAB HSE: variable speed scroll compressors

RTMA: fixed speed screw compressors

Main features

- "Best-in-class" energy efficiency – high efficiency heat exchangers and compressors
- Industry leading acoustic comfort levels
- Variable speed driven scroll compressors (CMAB HSE only)
- Stainless steel, AISI 316, brazed plate evaporator and recovery heat exchangers (all CMAB)
- W or V shaped coils for improved air flow and easy maintenance access
- Cross Exchange HX technology – avoids shutdowns caused by anti-freeze alarms
- High precision electronic expansion valves
- Large operating map
- Dynamic Logic Control – an electronic controller managing the differential of the inlet water temperature on the basis of speed of its variation
- Innovative electronic controller significantly decreases the number of defrosting cycles (up to 50 % less)
- Serial card RS485 for Modbus

CMAB/RTMA

Multi-pipe units Scroll or screw compressors

Options

- Acoustic packages: low noise or super low noise
- Different built-in hydraulic kits available with chilled water and hot water pumps of 150/250/450 kPa and with or without stand-by pumps
- Electronically Commutated (EC) fans with innovative fan profile to reduce power input and noise emissions
- Module for high temperature hot water up to 65°C (RTMA only)
- Compressor sound attenuating jackets
- Condensing coil protection grilles
- Epoxy coated condensing coils
- Power factor correction to cos phi 0.91
- High static pressure EC fans up to 100 Pa
- Control panel electric heater with thermostat
- Soft starter
- Automatic circuit breakers

Accessories

- Serial card with BACnet™ protocol TCP/IP or MS/TP
- LonTalk™ gateway
- Remote control display
- Automatic water filling
- Water gauges /gas gauges
- Rubber or spring anti-vibration mounts

Controls

- For units with 2/3/4 independent refrigerant circuits the precise control is by 2 separate controllers ensuring maximum reliability and redundancy. The 2 controllers are interconnected and communicate via the ModBus™ protocol
- Ability to interface with main BMS systems via ModBus™, BACnet™ or LonTalk™
- Condenser/evaporator pressure control with variable fan speed modulation to allow low ambient operation, in heating mode, down to -18°C (scroll) and -15°C (screw)
- Phase failure protection on compressors and fans
- Compressor rotation with FIFO logic

CMAB SE/HE with fixed speed scroll compressors, R410A refrigerant

TRANE®

Airside Products

Incorporating the right airside products into your HVAC system is a critical part of creating world-class performance and reducing overall energy consumption.

By helping you select the right airside components, Trane can help address indoor air quality issues such as temperature and humidity, ventilation, mold, bacteria, other particulate matter, and noise.

UniTrane™ Harmony

Fan coil water terminals

Customer benefits

- Silent operation: high level of acoustic comfort
- Low cost of ownership: low energy consumption
- Easy to install and graceful cabinet design
- Ultimate filtration, high efficiency, and reduced pressure drop: CleanEffects™ electrostatic filters capture even the finest micrometric particles without compromising unit performance
- The integrated Trane Tracer™ control system combines with the entire range to deliver efficient performance, optimal comfort and cost-effective building management

Range description

FCAS: Cabinet model, vertical installation, with front return air grille with AC fan motor

FCAE: Cabinet model, vertical installation, with front return air grille with EC fan motor

FKAS: Concealed model, horizontal or vertical installation with AC fan motor

FKAE: Concealed model, horizontal or vertical installation with EC fan motor

FVAS: Cabinet model, vertical installation with AC fan motor

FVAE: Cabinet model, vertical installation with EC fan motor

Main features

- Efficient water exchanger
- Robust resilient air grille diffuser

- Multi-speed AC or speed modulating EC fan motor factory set to fit customer requirements
- Very quiet, aesthetic, robust and efficient units
- Cleanable EU3 filter

Options

- Factory-mounted unit support feet for FVAS/FVAE models
- Factory-mounted return air grille for FVAS/FVAE models
- Factory-mounted 2 and 3-way water valves with thermal or modulating actuators
- Wall or unit fitted thermostat interface
- Large choice of electric heater capacities per unit size
- High external static pressure available
- Right/left end water and control access sides
- Epoxy coated aluminum fins
- Fresh air intake connection

Accessories

- Adjustment valves
- Unit support feet
- Rear panel for installations against glass
- Electric heater
- Auxiliary condensate pump
- Fresh air intake louvers grille
- Inlet/outlet grilles for concealed installations

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

Controls

- Large choice of wall thermostats to cover all standalone unit applications
- Wireless remote control
- Connection of individual units or groups of units via serial link
- Versatile group control, compatible with Modbus communication protocol

UniTrane™ D-Line

Ductable fan coil water terminals

Customer benefits

- Compact 2-pipe or 4-pipe design
- Suitable for horizontal and vertical installation
- Silent operation: high level of acoustic comfort
- Low cost of ownership: low energy consumption
- Easy installation

Range description

DFS: concealed horizontal fan coil with AC fan motor

DFE: concealed horizontal fan coil with EC fan motor

Main features

- Multi-speed AC or speed modulating EC fan motor factory set to fit customer requirements
- Efficient water exchanger
- Heat exchanger: drawn copper tube with aluminum fins
- Centrifugal fans and electric 5-speed motors for reduced electrical consumption (DFS)
- Three phase permanent magnet brushless electronic motor (DFE)
- Polypropylene cellular fabric regenerating filter
- High quality robust casing

Accessories

- 3-way valve for main or additional coil
- 2-way valve for main or additional coil
- Oventrop valve kit
- G3 or G0 filters
- Right/left end water and control access sides
- Fresh air intake connection
- Frontal air intake
- Inlet and outlet grids
- Inlet and diffuser plenum
- Auxiliary condensate tray
- Drain pump for horizontal installation
- Condensate pump for vertical installations
- Electric heater

Controls

- Large choice of wall thermostats to cover all standalone unit applications
- Versatile group control, compatible with Modbus communication protocol
- Connection of individual units or groups of units via serial link
- Wireless remote control
- Speed switch (slave) to control up to 8 units

Energy saving options

- EC fan motor allows for 67% annual energy savings

UniTrane™ B-Line

Ductable water terminals

Customer benefits

- Compact 2-pipe or 4-pipe design: designed for concealed installations
- Silent operation: high level of acoustic comfort
- Low cost of ownership: low energy consumption
- Easy installation

Main features

- Multi-speed AC fan motor
- Static pressure up to 160 Pa (sizes 1-5) and up to 425 Pa (sizes 6-7)
- Heat exchanger: drawn copper tube with aluminum fins
- Quiet centrifugal fans
- Polypropylene cellular fabric regenerating filter
- High quality robust casing

Accessories

- Main or auxiliary coil kit valve, 230V ON-OFF
- Main or auxiliary coil kit valve, 24V
- Right/left end water connections
- Electric heater
- Intake/supply spigot plenum
- Wall or unit fitted thermostat interface.
- G3 synthetic cleanable filter, Eurovent EU3
- GAV anti-vibration connection

Controls

- Large choice of wall thermostats to cover all standalone unit applications
- Versatile group control, compatible with Modbus communication protocol
- Connection of individual units or groups of units via serial link
- Wireless remote control
- Speed switch (slave) to control up to 8 units

UniTrane™ W-Line

High wall fan coil units

Customer benefits

- Optimum comfort and high performance
- Minimized sound emissions
- Modern and appealing design
- Low cost of ownership: low energy consumption
- Modular 2-pipe design, easy to install

Range description

WFS: concealed horizontal fan coil with AC fan motor

WFE: concealed horizontal fan coil with EC fan motor

WFS/E: Wired wall control

WFS/E-IR: Infra-red remote control (single unit control)

WFS/E-MB: MB electronic board for Modbus management (multiple unit control)

WFS/E-EH: Electric heater

Main features

- Casing made of auto-extinguishing ABS UL94 HB plastic
- Washable synthetic filter, readily accessible.
- Single phase 3-speeds electric motor (WFS)
- Electronically commutated (WFE) fan motor
- Heat exchanger: Drawn copper tube with aluminum fins

Accessories

- 2-way valve including control kit: ON-OFF, with electric motor and mounting kit
- 3-way valve including control kit: 230V ON-OFF, with electric motor and mounting kit with micrometric lock shield valve
- Condensate drain pan

Controls

- Large choice of wall-mounted thermostats to cover all standalone unit applications
- Versatile group control, compatible with Modbus communication protocol
- Wireless remote control

Energy saving options

- Low consumption EC fan motor on WFE version allows for 67% annual energy savings.

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office

CWS CWE

4-way cassette water terminals

Customer benefits

- Silent operation: high level of acoustic comfort
- 4-way air diffusion with excellent Coanda effect
- Factory-configured unit for ease of installation for immediate start-up
- Best of control technology to deliver a remarkable level of comfort

Range description

CWS: Cassette with AC fan motor

CWE: Cassette with EC fan motor

Main features

- Low profile with 296 or 329 mm unit height fits in all narrow false ceiling voids
- Standard AC or advanced EC fan motor technology
- 3 factory-set fan speeds
- Factory-mounted centrifugal drain pump
- Adjustable discharge louvers
- Fresh intake connections on three sides
- Discharge air connections on two sides
- Return air sensor with infrared remote or electronic user interface controls

Options

- Factory-mounted electric heater
- All type of applications available associated with large choice of efficient exchangers
- Infrared remote control to be mounted on-site

Accessories

- On/off 2 and 3-way water valve with thermal actuators
- Fresh air spigots

Controls

- Large choice of wall thermostats to cover all standalone unit applications
- Group control up to 20 units using infrared remote control or the wall-mounted user interface ETN/ECM with ambient sensor

Energy saving options

- EC fan motor allows for 60% annual energy savings

(1) At Eurovent conditions: 27/19°C return air temperatures and 7/12°C inlet and outlet water temperatures

(2) At Eurovent conditions: 2-pipe air 20°C, water +50°C inlet; 4-pipe air 20°C, water +70/60°C inlet/outlet

(3) Values calculated from sound power levels with a hypothetical acoustic attenuation of 9 dB

CFAS CFAE

1-way cassette water terminals

Customer benefits

- Air distribution through perfect Coanda effect for a high level of comfort
- Silent operation: high level of acoustic comfort
- Factory-configured unit controls for ease of installation and immediate start up
- Best of control technology to deliver a remarkable level of comfort
- Excellent air filtering with the louvered return air grill design which frees up 100% of opening space to the filter

Range description

CFAS: cassette with AC fan motor

CFAE: cassette with EC fan motor

Main features

- Low profile with 306 mm unit height fits in all narrowed false ceiling voids
- Louvered linear return air grill with 45° pitch angle avoid mix of supply and return air
- Supply air round dampers with 4 jaws sized to optimize the air throw at all fan speeds
- 3 fan speeds factory set, adjustable on-site
- Fresh intake connections on two return airsides

Options

- Raised plenum version increases the condensate gravity drainage capability up to 160 mm
- G0 or EU3 filter factory-mounted

- 2 fan speeds factory set for perfect capacity and sound fit to air-conditioning load
- Factory-mounted electric heater, drain pump, 2 and 3-way water valves
- Factory-mounted controls for standalone, master/slave and Building Management System applications

Accessories

- Constant volume dampers from 30 to 180 m³/h associated with Ø 99 or Ø 124 mm spigot
- Auxiliary drain pan for left or right hand
- On/off 2 and 3-way water valve with thermal actuators
- Large selection of thermostats

Controls

- Large choice of wall thermostats to cover all standalone unit applications
- Up to 20 units group control with infrared or wall-mounted thermostat interface

Energy saving options

- EC fan motor allows for 60% annual energy

CLCF Climate Changer™

Air handling units for comfort applications

- Full perimeter integrated unit base frame
- Unitized structured panel design, minimizing seams that introduce air leak paths
- EPDM seamless gasket seals integrated into the door panels
- All types of components available
- Eurovent Certified: casing air leakage: L1; casing strength: D1; filter bypass leakage: F9; thermal transmittance: T2; thermal bridging factor: TB2

Options

- Panel material: galvanized steel, painted galvanized steel, aluminum, stainless steel 304, 316, or 316L
- High density Rockwool insulation (80 kg/m³)
- Roof (standard or pitched), bird screens
- Sound attenuators
- All internal parts painted or made of stainless steel

Controls

- Factory-engineered, mounted, tested and pre-commissioned controls
- Quick connect wiring and cabling done in-factory
- Single power source for all machine power components (fan motors, electric heaters, etc.)
- Segregated cable change for easy service access and a protected, clean, and reliable cabling system
- Open protocol platform
- Possibility for connectivity to Building Management System
- Full commissioning provided by Trane experts

Customer benefits

Superior performance

- Airflow from 1000 m³/h to 60000 m³/h - 31 sizes
- Special low height sizes for false ceiling applications
- Wide array of fan technologies (forward, backward, plug fan) and coil options for greater unit flexibility

High energy efficiency

- Broad selection of energy recovery options (heat wheel, plate heat exchanger, coil loop)
- Increased energy efficiency performance - up to 90%
- Eurovent Energy class A and low specific fan power and energy consumption
- EC plug fans

Reliable indoor air quality

- 4-point inclined floor serves as integrated drain pan
- Vertical natural drainage inhibits bacterial growth
- Compliant to VDI 6022 and DIN 1946

Lower installed costs

- Integrated lifting lugs for easier handling
- Quick, unique and reliable tool-less connection system

Main features

- Frameless casing for reduced pressure drops
- 50 mm polyurethane foam-injected panels; homogenous inert/non-fibered insulation
- Internal thermal breaks and thermal break access doors
- 4-point single piece inclined floor under sections creating condensate, promotes liquid run-off
- Centralized vertical drain

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

CLCF Climate Changer™

Air handling units for hospital,
laboratory and pharmaceutical
applications

Customer benefits

Reliable Indoor Air Quality

- 4-point single piece inclined floor under sections creating condensate, promotes liquid run-off
- Centralized vertical drain
- Watertight casing for disinfection using liquid products
- Clean concept construction for highest hygienic requirements
- Completely smooth interior panels and rounded corners
- Compliant to VDI 6022 and DIN 1946

Superior Performance

- Airflow from 1000 m³/h to 60000 m³/h - 31 sizes, tested and pre-commissioned controls
- Special low height sizes for false ceiling applications
- Wide array of fan technologies (forward, backward, plug fan) and coil options for greater unit flexibility

Lower Installed Costs

- Integrated lifting lugs for easier handling
- Quick, unique and reliable tool-less connection system

High Energy Efficiency

- Energy recovery options (plate heat exchangers, coil loops)
 - up to 90% improved energy efficiency performance
- EC plug fans
- Eurovent Energy class A and low specific fan power and energy consumption

Main features

- Frameless casing for reduced pressure drops
- 50 mm polyurethane foam-injected panels; homogenous inert/non-fibered insulation
- Internal thermal breaks and thermal break access doors
- Full perimeter integrated unit base frame

- Unitized structured panel design, minimizing seams that introduce air leak paths
- EPDM seamless gasket seals integrated into the door panels
- All types of components available
- Eurovent Certified: Casing air leakage: L1; casing strength: D1; filter bypass leakage: F9; thermal transmittance: T2; thermal bridging factor: TB2

Options

- 4-point inclined floor available for all unit sections in stainless steel 304, 316, or 316L (or other materials)
- Eurovent Class 3 or 4 dampers EN 1751
- Antimicrobial copper coil fins
- Panel material: galvanized steel, painted galvanized steel, aluminum, stainless steel 304, 316, or 316L
- High density Rockwool insulation (80 kg/m³)
- Roof (standard or pitched), bird screens
- All internal parts coated or made in stainless steel
- Sound attenuators

Controls

- Factory-engineered, mounted, tested and pre-commissioned controls
- Quick connect wiring and cabling done in-factory
- Single power source for all machine power components (fan motors, electric heaters, etc.)
- Segregated cable change for easy service access and a protected, clean, and reliable cabling system
- Open protocol platform
- Possibility for connectivity to Building Management System
- Full commissioning provided by Trane experts

CCTA - CCTB

Air handling units for custom applications

Customer benefits

- Extreme flexibility in construction and dimensions to fit your exact requirements
- Easy installation via modular construction and easy module connection system
- Low energy consumptions and specific fan power with high efficiency recovery and components
- Cleanable and enhanced casing design for higher indoor air quality
- Compliant to VDI 6022 and DIN 1946 available with Eurovent Class A energy class
- All panels removable for fully accessibility

Main features CCTA

- 180 standard units sizes unit sizes for airflow from 1000 to 140000 m³/h: indoor and outdoor versions
- Special design on request up to 200000 m³/h
- Casing thermal performances: D1/L1/F9/T2/TB3 (Casing CCTA 50 mm MW) Eurovent certified
- Strong casing framework manufactured with extruded anti-corrosion aluminium profiles, fitted with nylon fibre glass stiffened angles
- Double sealing system to provide optimal casing air leakage
- Exclusive panel fixing system, with screwless panel-lock system, providing a neat external finishing
- 25 or 50 mm thick sandwich-type panels made of galvanized steel inside and white pre-painted steel outside
- Panel insulation made of CFC-free injected polyurethane foam
- Filters fitted on self compressive rail system
- Coil mounted on rails for easy removal
- Available components: panel and bag filters, HEPA filters, activated carbon filters, auto-roll filter, FC/BI/Aerofoil centrifugal fans EC motors, plug fans, water coils, DX coil, electric heaters, steam coils, condensing coils, air washers,

steam humidifiers, evaporative humidifiers, atomizing humidifiers, plate heat exchangers, thermal wheels, run around coils, silencers, mixing chambers, multi-zone sections

Main features CCTB

- Same flexibility as CCTA range, with:
 - Aluminium frame work with integrated plastic thermal break
 - 40 or 60 mm thick panels with integrated thermal break, polyurethane foam insulation
 - Enhanced casing thermal performances: D1/L1/F9/T2/TB2 Eurovent certified
 - Smooth internal walls with 4 points inclined drain pan

Options

- High density Rockwool insulation (80 kg/m³)
- Inner / outer skins made of peraluman, stainless steel 304 or 316 metal sheet
- Flat packed/kit form delivery
- All internal parts coated or made in stainless steel

Accessories

- Inspection windows and wired lights
- Manometers and pressure switches
- Flexible connections, weather louvers, intake hoods, sand trap louvers

Controls

- Factory-engineered, mounted, tested and pre-commissioned controls
- Quick connect wiring and cabling done in-factory
- Single power source for all machine power components (fan motors, electric heaters, etc.)
- Segregated cable change for easy service access and a protected, clean, and reliable cabling system
- Open protocol platform
- Possibility for connectivity to Building Management System
- Full commissioning provided by Trane experts

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

CCEB

Customized air handling units
for healthcare and industrial
applications

Customer benefits

- High build quality and reliability, designed for the most demanding applications
- High flexibility to provide customized solutions
- Clean concept construction, designed to meet highest hygienic requirements
- Use the finest technologies available to provide the lowest specific fan power and energy consumptions
- Quick and easy installation and maintenance
- Available with Eurovent Class A energy class
- Compliant to EN13 053, VDI 6022 and DIN 1946

Main features

- Modular casing construction, Indoor and outdoor versions
- Vertically staked, in line, side by side, L-shaped configuration
- 54 standard unit sizes. Airflows from 1000 to 140000 m³/h (0.3 to 38 m³/s)
- Bigger and special unit sizes to cover airflows up to 200000 m³/h upon request
- 50 mm double skin panels with mineral wool insulation
- Inner skin: galvanized steel, outer skin: PVC coated, white color
- High casing air tightness: Class C according to BS/DW144 & Eurovent 2/2 (0.42l/s/m² @ 2000 Pa)
- Mechanical classes (EN1886): D1/L1/F9/T3/TB3 or T2/TB2, Eurovent certified
- Smooth internal walls, minimized dust traps, easy to clean

- Available components: panel and bag filters, HEPA filters, activated carbon filters, auto-roll filter, FC/BI/aerofoil centrifugal fans, plug fans, water coils, DX coil, electric heaters, steam coils, condensing coils, air washers, steam humidifiers, evaporative humidifiers, cross & counter flow plate heat exchangers, thermal wheels, run around coils, silencers, mixing chambers, multi-zone sections

Options

- Plug fans with EC motors and fan walls (Class IE4)
- ATEX certified construction; group II, category 2 and 3
- Panel material: galvanized steel, PVC coating, Peraluman, stainless steel 304 and 316L
- All internal parts coated or made in stainless steel
- Flat packed/kit form delivery
- Inclined floor and anti-bacteriologic seals
- All components fitted on rails for easy removal
- Factory-installed controls
- Outdoor version with inclined roof

Accessories

- Inspection windows and wired lights
- Manometers and pressure switches
- Flexible connections, weather louvers, intake hoods, sand trap louvers
- Motor lifting beam, adjustable legs

Controls

- Factory-installed controls including complete controls panels, sensors & actuators.
- Adjustable/variable speed fans with variable frequency drives or EC motors.
- Siemens controller, factory programmed.
- Tested and pre-commissioned prior shipment.
- Standalone or communicating system with BACnet® MS/TP, BACnet® IP, ModUS RTU, LON, or Webserver.

Energy saving options

- Class A energy classes as per Eurovent
- High efficiency heat recovery devices:
 - Sensible, enthalpy or sorption wheels
 - Plate heat exchangers up to 92% efficiency
 - Run around coils
- High efficiency plug fans
- IE3 class fan motors, EC motors Class IE4
- Adiabatic cooling systems
- Optimized controls strategies

TRANE®

DX Unitary Systems

Unitary systems combine heating, cooling, and fan sections all in one and are used in most classes of buildings, from schools to offices to retail, particularly where low initial cost and simplified installation are important. Our commercial unitary systems feature integrated controls engineered to create the best possible comfort environment for your investment.

Airfinity™

Packaged rooftops

Customer benefits

- Easy installation, operation and maintenance
- Energy savings and heat recovery solutions
- Optimum comfort and high Indoor Air Quality
- Ideal for retail applications

- Easy communication: Easy to integrate with Building Automation System thanks to compatibility with Modbus, Bacnet, and LonTalk protocols
- Flexible: Wide selection of options and accessories available

Range description

IC: Cooling-only unit

IH: Reversible unit

Main features

- Solid construction: Weather and age resistant casing made of zinc-coated, heavy-gauge, galvanized steel pre-painted with RAL 9002 powder paint
- High performance: High efficiency hermetic scroll type compressors in tandem for high seasonal efficiency. High full load efficiency with Eurovent Class A or B
- Energy savings: Free cooling and heat recovery solutions for maximum energy savings
- Proven reliability: Dual refrigeration circuit, high quality components and improved control algorithms for market-leading reliability
- Ideal comfort: Electronically commutated (EC) supply plug fan with variable flow control for optimum comfort and higher energy savings
- High indoor air quality: Double filtration with minimum G4 filters (up to F9 provided as option). Fully insulated indoor air section with double wall panel and self-maintained glass wool insulation with specifications according to DIN EN 1602

Options and accessories

- Auxiliary heat options (electric heater, hot water coil, integrated gas burner)
- Heat recovery solutions
- Building pressurization control
- Low ambient operation
- Electronic wall thermostats and user interfaces
- Service terminal
- Multi-rooftop control and management
- Adjustable roofcurbs

Airfinity™ Solar

Solar-ready rooftops powered by PV panels

Customer benefits

- Complete package: You no longer need to think about your PV installation and HVAC equipment separately. Trane can provide you with the complete package, ensuring you have the optimum design for your installation and simplifying logistics.
- Plug & Play: All components have been carefully selected to be easily connectable on-site, without any hassle.
- Independent and reliable: The system is designed to be entirely based on self-consumption, which means you can eliminate the heavy bureaucratic load traditionally associated with on-grid type systems.
- Ideal for BREAAM / LEED building certification: Increase the value of your property by using completely renewable and sustainable technologies.

Production

Airfinity™ Solar combines the best of both worlds: market-leading rooftop air-conditioning units together with proven silicon PV technology and best-in-class inverters.

As soon as the sun is shining, the PV panels contribute to the electricity needs of the rooftop unit. The total savings of the system depend on the local irradiance (sunlight per sqm and per year) and on the electricity purchase price.

The system comprises:

- ① Airfinity™ rooftop units: High-efficiency direct-expansion air-conditioning units designed to provide air-conditioning and ventilation to an indoor space.
- ② Silicon photovoltaic panels: The most widely-used technology to convert solar energy into DC electrical power.

- ③ Mounting structure: Used to support the PV panels without puncturing the building's roof. The membranes are durable but lightweight and serve as a wind deflector.
- ④ High efficiency inverter: Converts DC power supply provided by the PV panels into AC power needed to operate the rooftop HVAC unit and to feed into the utility grid.

- ⑤ Cables and connectors: Double-insulated and UV resistant cables suitable for rooftop applications with water resistant IP65 crimped connectors.

Packaged rooftop

Customer benefits

- Single packaged air/air unit: simple installation
- High performance: lowest energy consumption
- High reliability: low maintenance costs

Range description

- TSD/YSD/WSD: Downflow air discharge and intake
- TSH/YSH/WSH: Horizontal flow air discharge and intake
- TSD/TSH: Cooling-only unit
- YSD/YSH: Cooling-only unit with gas heat
- WSD/WSH: Reversible heat pump unit

Main features

- Eurovent certified performances
- High efficiency in cooling and heating
- Single-side access for easy service
- Pitched/removable drain pan
- Corrosion-resistant cabinet with epoxy-coated condenser coil and hail guard as standard

Options

- Electric heater (TSD/TSH/WSD/WSH)
- Hot water coil with 3-way-valve (TSD/TSH/WSD/WSH)
- Gas burners, compatible with G20, G25 and G31 gas (YSD/YSH)
- Fresh air intake for air quality and/or energy savings (free cooling) through advanced comparative enthalpy economizer
- Fresh air volume controlled by remote potentiometer, CO₂ sensor or communication interface
- Fire thermostat/smoke detector
- Clogged filter sensor/fan failure switch

Accessories

- Adjustable or non-adjustable roofcurbs
- Electronic (THS03) and programmable (THP03) zone sensor modules
- Quick adaptation curb (replacement market)
- TD5 Service and Diagnostic full color touchscreen display

ReliaTel™ Controls

- 24 V easy-to-start and service microprocessor controls
- Built-in conventional thermostat interface
- Remote on/off input
- LonTalk®, Modbus®, BACnet® communication capabilities

RAUL

Condensing unit

Customer benefits

- Flexibility: customized system to fit the application's exact requirements

Main features

- Scroll compressors –hermetic, high efficiency, low vibration, low sound
- Full internal overheating protections
- Access panels are quickly removable using a square key
- Disconnect switch and transformer
- Discharge and liquid line service valves
- Evaporator temperature sensor
- External sheet metal parts are galvanized and finished with powder paint RAL 9002

Options

- Low ambient operation
- 380, 400 and 415V power voltage
- Epoxy-coated aluminium fins
- Copper fins
- Compressor sound attenuating jackets
- High and low pressure gauges
- Auxiliary card to validate auxiliary temperature setpoint with a remote contact
- Phase reversal protection

- Factory-mounted LonTalk® serial link allowing you to:
 - Modify temperature setpoint
 - Start or stop the unit
 - Monitor air temperature setpoint, ambient air temperature, condensing unit operation, fans, compressors alarms

Trane Tracer™ CH530 Control

Adaptive Control™ microprocessor featuring:

- Easy-to-use operator interface panel
- External Auto/Stop
- Remote contact to start and stop each compressor
- Cooling and current-limit remote setpoint card (optional)
- LonTalk® communication card (optional)
- Programmable fault card 4 relays (optional)

RAUS/RAUX

Condensing unit

Customer benefits

- Low power consumption thanks to high efficiency condenser coils with integrated sub cooling circuit enhancing both capacity and efficiency
- Small footprint and horizontal airflow

Range description

- RAUS cooling-only
- RAUX heat pump

Main features

- Scroll compressor
- High efficiency condenser coil with seamless copper tubes and aluminum fins
- Low ambient condensing pressure control with variable fan speed modulation
- Plastic condensing coil protection grille
- Electrical panel
- Casing and panels in galvanized and powder painted steel

Options

- Compressors sound jackets
- Soft - starter
- Control panel electric heater with thermostat
- Phase failure protection relay
- Epoxy coated condensing coils

Accessories

- Remote control panel
- Communication card RS485
- Connection kit including:
 - thermostatic expansion valve
 - filter dryer with sight glass
 - liquid line solenoid valve
- Liquid receiver
- Service valves on the suction, liquid and equalization lines
- Rubber anti vibration mounts

Controls

- Microprocessor-based controller to manage unit on/off mode, operating mode setting, parameters setting, and error code display

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

Jupiter

Close control unit

Customer benefits

- Compact design: space savings in plant rooms
- Accuracy: accurate temperature and humidity control for any size of application
- High performance: lowest energy consumption. EC fan motor (option)

Range description

Unit with AC motor and forward curved fan

JDCC: Chilled water downflow

JUCC: Chilled water upflow

JDAC: Air-cooled direct expansion downflow

JUAC: Air-cooled direct expansion upflow

JDWC: Water-cooled direct expansion downflow

JUWC: Water-cooled direct expansion upflow

Unit with EC motor and backward curved fan

JDCV: Chilled water downflow

JUCV: Chilled water upflow

JDAV: Air-cooled direct expansion downflow

JUAV: Air-cooled direct expansion upflow

JDWV: Water-cooled direct expansion downflow

JUWV: Water-cooled direct expansion upflow

Main features

- Designed for environments in which high-tech equipment is the predominant heat source and comfort applications (offices...)
- Front access for total unit maintenance
- Double inlet galvanized steel centrifugal fans with forward curved blades

Options

- Electric reheat/hot water reheat
- High pressure centrifugal fans
- Electrode boiler humidifier
- High efficiency filters
- Fresh air module with filter
- Air suction from the front, rear or base (upflow configuration only)

Accessories

- Dirty filter alarm (differential pressure switch)
- Temperature and humidity sensor
- Base frames and plenums (intake or discharge) for easier integration
- External sensors for high ambient temperature and humidity alarm signals
- Fire and/or smoke detector
- Water leak detector with one sensor
- Excess pressure damper

Control

mP40 microprocessor control module with easy-to-use LCD graphic display

- Temperature and humidity control and recording system
- Complete alarm signaling and recording system
- Automatic restart
- Remote auto off function
- On-site language selection
- Connectivity with the most common communication protocols (BACnet®/LonTalk®/Modbus®/...) or local RS485 network

This description may not include all options and accessories available. For full technical information, visit www.trane.com/litweb or contact your local sales office.

Mercury

Close control unit

Customer benefits

- Flexibility: customized system to fit the application's exact requirements
- Accuracy: accurate temperature and humidity control for demanding applications
- Sound level: one of the best acoustic comfort levels available in the market place

- Hot water/hot gas reheat
- Variable speed EC fans motor
- Electrode boiler humidifier
- Air filters
- Fresh air module
- Air suction from the front, rear or base (upflow configuration only)
- Front discharge floor stand
- Different acoustic linings for the panels of the unit casing
- Electronic expansion valve

Range description

Unit with AC motor and backward curved fan

EDCB: Chilled water downflow

EUCB: Chilled water upflow

EDAB: Air-cooled direct expansion downflow

EUAB: Air-cooled direct expansion upflow

EDWB: Water-cooled direct expansion downflow

EDWV: Water-cooled direct expansion downflow

EUWV: Water-cooled direct expansion upflow

Main features

- Designed for environments in which high-tech equipment is the predominant heat source
- Front access for total unit maintenance
- High pressure centrifugal plenum fans with backward curved blades

Options

- Electric reheat/enhanced electric reheat

Accessories

- Condensate drain pump
- Humidifier condensate drain pump
- External sensors for high ambient temperature and humidity alarm signals
- Fire and/or smoke detector
- Water leak detector
- Base frames and plenums (intake or discharge) for easier integration

Control

A mP40 microprocessor control module with easy-to-use LCD graphic display

- Temperature and humidity control
- Complete alarm signaling and recording system
- Automatic restart
- Remote auto off function
- On-site language selection
- Connectivity with the most common communication protocols (BACnet®/LonTalk®/Modbus®/...) or local RS485 network

Notes

TRANE®

Controls

With a comprehensive understanding of your strategy and requirements, we can recommend and implement solutions to achieve your goals and reduce your HVAC system lifecycle costs.

Trane controls

Enterprise		Tracer Ensemble™		
Building		Tracer™ SC		
Equipment		Tracer™ UC		
Occupant spaces		Wireless sensors		

Trane's controls product portfolio offers a full range of devices that have been developed within Trane and Ingersoll Rand engineering and Centers of Excellence around the world.

Trane HVAC controls products were developed by (and for) HVAC systems specialists. This unique approach takes into account the system design requirements for both the HVAC application and the HVAC equipment. In this way, consideration is given both to the individual controlled equipment AND also to the functionality of the Building Management System (BMS), as well as to the SYSTEM overall performance. The field controllers are pre-programmed, pre-tested and factory-mounted on our HVAC equipment. This ensures a highly reliable and efficient equipment, while the commissioning process is reduced to its simplest tasks, thus saving valuable time and resources on site, while ensuring high performance and reliability of the controls.

Trane field controllers have advanced equipment HVAC embedded application libraries which have been developed over 100 years of experience. This provides our equipment with the best life cycle and the best efficiencies. All Trane HVAC applications are designed to improve the commissioning and maintenance processes and also to reduce overall operating cost.

Having the best performing HVAC equipment controls is not enough to make sure the system delivers the best efficiency.

At the process level, Trane has in depth technical knowledge on complex HVAC system applications such as chilled water variable primary flow, ice storage, free cooling, heat recovery, variable air systems, etc. Each process focuses on different customer requirements such as space comfort, chilled water supply temperature/flow accuracy, indoor air quality, energy efficiency.

Trane supports you by selecting, designing and processing the best solutions for your HVAC system. Our building and HVAC controls solutions include pre-engineered applications, such as chiller plant control, variable air system control, automatic ventilation and IAQ control. On top of their total focus on HVAC expertise, Trane BMS solutions, offer full flexibility by natively supporting the latest IT technologies, such as IP networking, as well as web services support.

Open and secure architecture

Trane offers an open and secure controls Building Management architecture. The use of native open protocols allows for easy commissioning and facilitates maintenance as well as ensures a scalable and flexible system that can evolve to various controls products. It also allows the integration of third party equipment and BMS systems to the network.

For system level communications, which imply large quantities of data management, BACnet®/IP is used for its high speed and bandwidth communication capacity and ease of implementation – almost EVERY building has Ethernet TCP/IP network architecture.

For field-level communications, Trane solutions supports standard protocols such as LonWorks™, Modbus® and BACnet® MS/TP, offering a wide range integration solutions of Trane and other 3rd party equipment and devices controls.

All system level controllers, such as Tracer™ SC optimize the overall performance of the entire system they are in charge of. They store and execute system wide sequences of operations, coordinate all the system level functions across the entire project, and allow for remote communication through either Web services, or mail.

This system level is also in charge of backup and restore functionalities, as well as data collection for data logging. For large systems presenting several system-level controllers, Tracer Ensemble™, an enterprise-wide management server can be applied as to standardize the overall system look and feel, even with non-Trane BACnet® system controllers, as well as extend the overall system archiving capability, by using server-based technologies.

Smart Solutions for Smart Buildings

Building Controls

Building automation systems do not have to be complex to be effective. Typically a building automation system that is complex to use seldom achieves the energy and operational efficiencies as the capabilities of the systems are not fully utilized.

Trane's Building Management System (BMS) only requires limited settings with predefined functions such as time-of-day schedule, automatic setpoint reset, zone management or alarms menu.

Buildings often require rearrangement of their internal space. Trane's highly flexible system is simple to reconfigure and customize in order to match the evolving needs of the occupants.

Control at your fingertips

Trane's BMS uses the latest web technologies to enable access via a web browser on any device connected to the customer network or smart devices using the Trane app.

Energy savings

Energy efficiency is maximized without compromising system performance by employing pre-engineered HVAC strategies such as occupancy, ambient, indoor air quality, heat recovery and free cooling.

Trane's BMS can optimize and control ancillary equipment and systems such as lighting, energy metering and sunlight shading.

Project management

Trane can take responsibility for the delivery of the complete BMS to meet the project requirements. Trane personnel are experts in the efficient design, installation and commissioning of the entire HVAC system and can also provide ongoing maintenance services.

Smart Solutions for Smart Buildings

Equipment Controls

Chiller controllers

Tracer™ UC800 Controller

The latest generation of Trane centrifugal and screw chillers use advanced algorithms to keep them running under the most challenging conditions, when other chillers would simply shut down.

Tracer™ Color Touchscreen Display

The Tracer UC800 features a large (7" or 12") touchscreen full-color interface for simple, intuitive operation.

General purpose equipment unit controllers

- Tracer™ variable-air-volume controllers
- Tracer™ terminal unit controllers
- Tracer™ programmable controllers
- Tracer™ interfaces for chillers and rooftops

Field-installed controllers

Tracer™ UC400 / UC600 Programmable Unit Controllers

Programmable BACnet unit controllers with high I/O capabilities are designed to work with the Tracer™ SC and third-party BACnet systems. A standard library of applications is available to ensure trouble-free operation, whatever the requirements are.

Tracer™ SC

System Controller

Seamless facility management is a reality with this flexible, cost-effective solution. Any PC, tablet or connected device can provide access for programming.

Tracer SC eliminates the need for a dedicated computer and monitor. System performance can be managed whenever and wherever it is convenient. "Point-and-click" technology provides simple scheduling, data logging, graphical trending, reporting and applications programming. The intuitive online tools increase occupant comfort, increase efficiency and reduce energy costs, adding up to happier personnel and a better bottom line.

Tracer Ensemble™

Building Management Software

Tracer provides a web-based solution for managing single or multiple buildings from one interface.

- System visibility from any location allows total management of system status, alarms and schedules
- Reports enable enterprise-wide decision making for optimized performance
- BACnet® IP permits easy integration with other systems
- Tenant service and audit trail for critical controls available in option

Mobile App

Gain new freedom while maintaining a higher level of control. The Tracer™ BAS Operator Suite enables the operation of building control systems using a tablet or smart phone to:

- Monitor equipment
- Control spaces
- Make setpoint changes
- Manage alarms

The Tracer BAS Operator Suite works with iOS™ and Android™ devices.

Chiller Plant Controls

Take control of your chiller plant

Rising energy costs and operational conditions drive companies to seek greater returns from investments, in other words, get more with less. Additional pressures such as environmental and safety regulations force companies to remain vigilant in managing capital, human resources and infrastructure.

Performance Targets

Ever-increasing targets demand that facilities operate more efficiently, more effectively and for longer hours. The resultant pressure on the chiller plant may lead to increased operating costs or reduced performance.

Budget Allocations

Companies working with reduced budgets find it increasingly difficult to approve funding for capital investment projects. In the drive to reduce costs, system maintenance may be cut.

Regulations

Environmental initiatives demand sustainable operation. In many sectors such as food or pharmaceuticals, further traceability is a regulatory requirement.

Operating Costs

Running a cooling system is one of the most significant costs on any operating budget. It is extremely challenging to keep this expenditure flat, year on year, when the cost of energy is rising relentlessly.

According to the European Commission's Joint Research Centre (EC JRC), heating, ventilation and air-conditioning systems constitute 11% of electrical energy consumption in the EU member states. Chiller plants can consume over 7% of typical building energy consumption.

Advancing from control to optimization

With appropriate controls, optimal performance of the chiller plant can be achieved, resulting in increased system efficiency and reduced lifecycle costs. Trane's unparalleled knowledge of commercial cooling systems has produced the following range of advanced control solutions:

EcoSet

Most chillers produce the same water temperature throughout the year regardless of seasonal changes in cooling load. Trane's solution optimizes chiller performance by tracking these changes and adjusting the chilled water setpoint to improve chiller efficiency.

OptiPlant

Where installations use two air-cooled chillers, they often operate at much less than full load, and in some cases at only 50%. Trane OptiPlant will match the number of chillers in operation to the cooling requirements at any given time to substantially reduce run times.

Chiller Plant Manager

Trane Chiller Plant Manager ensures that only the required plant components operate at their most efficient point to minimize run times. Trane's advanced supervisory system will reduce operating costs by balancing component run times and will notify users when scheduled maintenance is required.

Chiller Plant Optimizer

Trane's most advanced controls solution takes a holistic view of the plant, optimizing operation of the complete system. The Chiller Plant Optimizer provides a comprehensive dashboard view enabling control at your fingertips and prompt action to address operational deviations.

Chiller Plant Controls

EcoSet

This control solution consists in raising the setpoint temperature when the building operates at less than design load conditions. Producing chilled water at a higher temperature lowers the burden on the compressor, which

reduces the energy consumption. Up to four chillers can be controlled with this solution. It is ideally suited to deliver comfort in office buildings where dehumidification is not a requirement.

Features	Function
Chilled Water Reset	Matches plant operation with prevailing conditions, reducing annual energy consumption by 3 to 10%.
Chiller Scheduling (optional)	Initiates chiller operation at a specific time of day to amplify energy savings and reduce compressor wear.

OptiPlant

Trane OptiPlant is the customized control solution for comfort cooling installations with two air-cooled chillers in small buildings and commercial spaces. Based on the chilled water demand, it will limit chiller operation and its

associated auxiliary equipment thus reducing operating costs. A touchscreen display allows you to monitor and control key operating parameters.
Energy monitoring version available.

Features	Function
Chiller Scheduling	Initiates chiller operation at a specific time of the day to amplify energy savings and reduce compressor wear.
Demand Limiting	Allows user to run no more than one chiller, independent of the load, when current draw needs to be limited.
Soft Start	Prevents excess capacity from being brought online at start up.
Chiller Rotation	Equalizes chiller operating time.

Chiller Plant Controls

Chiller Plant Manager

Trane Chiller Plant Manager is an advanced control solution recommended for chiller plant applications with multiple chillers. System components must work in harmony to

maximize comfort, compliance and performance. In addition to controlling the chillers, the Chiller Plant Manager also controls and sequences all components of the chiller plant.

Features	Function
Low Ambient Lock-out	Prevents the plant from operating below a preset external ambient temperature.
Failure Recovery Management	Automatically starts the next chiller in the sequence if one in operation fails.
Advanced System Control	Ensures only the required components are operating to meet a system load.
Programmed Maintenance	Advises when maintenance is due, based on elapsed time or run time.
Remote Operation	Provides browser and application support for both tablets and mobile phones.
Remote Alarming	Generates customizable alarms and delivers notification via email.
Data Trending	Displays key trends graphically for rapid interpretation and generates trend logs.

Chiller Plant Optimizer

Trane Chiller Plant Optimizer is a fully scalable and adaptable control solution that can optimize the performance of the chiller plant. This control solution

provides additional management data with customizable management dashboards.

Features	Function
Chiller/Cooling Tower Optimization	Calculates the optimal condenser water temperature to minimize energy usage.
Pump Pressure Optimization	Calculates the minimum pressure the pumps must deliver to satisfy the most demanding load.
Special Applications	Capable of controlling advanced functions including free cooling, heat recovery or thermal storage.
Scalability	The optimizer is fully scalable to meet the demands of the most complex installation.
Dashboard	Monitors system performance.

Chiller Plant Controls

Architecture

Trane chiller plant controls architecture is built around core high technology components.

Our control technologies are scalable for water-cooled or air-cooled chiller plant infrastructures.

programming and managing chiller plants that can extend to any HVAC equipment. Accessible from any PC, tablet or connected device, Tracer SC eliminates the need for a dedicated computer and monitor, so you can manage system performance whenever, wherever it is convenient.

Tracer™ UC600 Programmable Controller

A programmable BACnet unit controller designed to work with the Tracer SC and third-party BACnet MS/TP or BACnet IP systems. The UC600 has the I/O and size to meet the controls needs for multiple pump arrangements, cooling towers, dry coolers and central plants.

Tracer™ UC400 Programmable Controller

Tracer UC400 is an ideal solution when special sequences are required. Standard software applications come preloaded at the factory, simplifying field installation.

Tracer™ SC System Controller

Allows you to streamline facility management without reinventing the entire system. Adding Tracer SC to your system provides a flexible, cost effective solution for

Tracer™ TD7 Color Touchscreen Display

A 7 inch diagonal color touchscreen designed for both indoor and outdoor use. This visually intuitive solution makes it quicker and easier than ever to access the reliable control offered by the Tracer UC600.

Built on BACnet®

Tracer controls are built on the open BACnet® data communication protocol. Install Trane Tracer controls today, and you're ready for the future integration of additional building automation devices, from both Trane and other suppliers.

Notes

TRANE®

Building Services

Trane building services provide a wide range of offerings that enable you to benefit from the highest levels of performance from the systems in your facility. Whether you're installing new equipment, maintaining an existing system or completely upgrading your infrastructure, Trane building services provide exactly the expertise you need.

Trane Rental Services

Temporary cooling solutions

Customer benefits

Fast

Because speed of unit installation can be extremely important to your business, all Trane rental equipment has been fitted with enhancements that save installation time.

Safe and reliable

Whilst getting your system up and running is of utmost importance to your operation, safety and reliability of the equipment provided are equally important. You can depend on Trane modern equipment.

Cost-effective

Whatever the application, Trane can provide a cost-effective temporary cooling solution for your organization until you are able to repair or replace your existing equipment.

Main features

A temporary cooling system will keep your business operational whilst you repair, replace or upgrade your existing system.

Our team of account managers, engineers, service technicians and logistics professionals can rapidly transform the equipment you need into a smoothly functioning system that will exceed your expectations.

Elite Start™ services

Solutions for proper and optimized operation

Customer benefits

Trane's startup services are key to ensuring your new product purchases are installed correctly and operating at maximum performance during the first year. Trane's factory authorized technicians have access to the latest training and service tools to optimize ensure HVAC design performance and optimal operation.

Main features

- Startup - following prescribed engineering checklists to ensure all equipment functions meet operational parameters in a reliable and efficient manner.
- Operation - from startup, ensures new Trane products will operate within designed parameters.
- Performance - assures customers that new Trane products will operate at peak reliability and efficiency during first year of service. These services are available for all Trane products.

Trane Extended Start

Foundation for high performance buildings

Customer benefits

Assure first-year system performance

Make sure your HVAC system gets off to the right start with Trane Extended Start. It's the best way to validate proper installation and assure the highest level of performance during that all-important first year of operation.

Trane Extended Start goes above and beyond the warranty and includes five essential services and three optional services which will create a system baseline to build a strong high performance building foundation.

1. Validate Installation and Startup

Most HVAC failures that occur early in the system's life are during the first year of operation.

2. Monitor Critical Parameters and Adjust System Settings

Monitoring first-year operation and critical parameters is crucial during the initial break-in months. This assures your investment is properly integrated into your environment, and is providing peak performance and efficient energy use.

Main features

The baseline for high performance buildings: twelve months of value-added services

Trane Extended Start - 5 plus 3

5 Essential Services

- Post-installation inspection
 - to validate that installation and start-up were done to factory specifications.

- Benchmark report

- an analysis of the current operating characteristics of your equipment. It will be an "as-installed" benchmark to track changes in performance in later years.

- Health check inspection

- to measure critical parameters, adjust unit control settings and correct any operational deviations.

- Chiller oil analysis

- to analyze samples, indicate any deviation and recommend corrective actions.

- Filter changes

- as per Trane recommendations to maximize flow and system efficiency.

3 Optional Services

- Vibration analysis

- to establish a benchmark reference to later identify a range of future faults such as shaft misalignment, bearing defects, or motor electrical problems.

- Get connected

- to remotely monitor critical alarms, provide periodic communications link verification and produce automatic critical alarm activity reports.

- Operator training

- your operators receive on-site training on best operation and maintenance procedures to ensure safe, reliable and efficient operation of your system.

Trane Select™ Agreements

Comprehensive service contracts
for HVAC systems

24hrs/day, 7 days/week

Maintenance

Parts coverage

Lifecycle management

Customer benefits

Best cost of ownership

- Planned maintenance ensures your HVAC system runs at top efficiency, providing up to 12% energy savings.
- Your equipment will receive regular inspection, preventive maintenance and proper calibration. Any potential problem will be corrected before anyone in your building becomes aware of it.
- In choosing your level of coverage, you know exactly what services and parts are covered.
- There are no surprises when it comes to expenses.

Total peace of mind

- Trane looks out for your needs.

Main features

With our extended service plans, Trane is your ideal service solutions provider to protect your HVAC installation investment. Trane Select Contracts are tailored to fit your HVAC system needs and business requirements. They offer four different levels of coverage - from preventive maintenance plans to comprehensive maintenance.

Chiller Health Check Program

Customer benefits

Reliable, efficient performance and lower operational costs are directly linked to how your Trane chiller is maintained. The Trane Chiller Health Check Program is a step-by-step evaluation of the current performance status of your equipment. With the right information in hand, your Trane service expert will analyze the current status and provide you with a detailed report and suggestions for chiller performance enhancement.

Main features

Trane offers either a basic or comprehensive program. Both programs include an oil sample analysis in a laboratory to evaluate the presence of wear on the components and compare the current oil parameters to original specifications

The comprehensive program includes the eddy current and vibration analyses to verify the internal condition of the heat exchanger tube and the compressor respectively. The additional thermographic inspection provides immediate status of the electrical panel.

Any signs of deterioration will be noted during the different inspections. Your Trane expert will be able to suggest the best solution to fix any issues and quickly restore your Trane chiller to optimal operating conditions.

Trane Building Advantage

Customer benefits

Your building and its HVAC system represent one of your organization's most significant capital investments. On the operating side, 40 to 60% of your total energy budget goes into running that chiller plant. Our mission with Trane Building Advantage is clear: to bring you the services, tools, equipment and expertise to transform your building in terms of cost, performance and positive environmental impact.

Our customers measure HVAC systems by their reliability, efficiency and environmental impact. The suite of enhancement solutions we call Trane Building Advantage has been developed to deliver results at both the individual component level and the plant level.

Main features

Trane Building Advantage will transform your HVAC system into strategic business advantages:

Reliability

- Analyse your existing system and provide detailed diagnoses and recommendations
- Develop a proactive maintenance plan
- Reduce the risk of breakdowns
- Extend equipment life

Efficiency

- Identify and unlock energy savings within your system
- Upgrade equipment and meet ROI targets
- Enhance existing equipment through maintenance and retrofit

Environment

- Manage the use of scarce energy resources
- Minimize carbon footprint
- Meet regulatory requirements
- Optimize the quality of the working environment

Each of our three strategies - Analyze - Optimize - Modernize - is supported by a range of solutions.

Analyze:

extract key data from your system and use it to make informed decisions.
Oil analysis, Thermography, Tube testing, Vibration analysis, Chiller plant analysis, Metering, Refrigerant leak testing, Refrigerant monitor

Optimize:

achieve optimum operation of your existing equipment.
Compressor R'newal, Exchanger enhancement, Adiabatic cooling, Automatic tube cleaning, Exchanger cleaning, Power factor correction, Noise reduction, Refrigerant management

Modernize:

use targeted interventions with the latest technology to update part or all of your system.
Adaptive Frequency Drive, Chiller control retrofit, Chiller plant manager, Chiller upgrade, FreeCool, OptiPlant, Partial heat recovery, Refrigerant retrofit

Adiabatic cooling

Customer benefits

Adiabatic cooling reduces the temperature of the air entering the coil, facilitating improvement of equipment reliability and efficiency.

- Reduction of system power input
- Delivery of design capacity without interruptions
- Extension of equipment operating range beyond its original specifications.
- Permits R404 refrigerant retrofit
- Increase in reliability thanks to reduction in compressor discharge temperature, so compressor components are less stressed and operate in better conditions.
- Coil stays cleaner longer because the mesh placed in front of it acts as a self-cleaning filter.

Main features

The Trane Adiabatic Cooling concept is based on the natural thermodynamic properties of water.

Water is sprayed intermittently onto large non-metallic mesh panels installed in front of the heat reduction coils of chillers, remote condensers, rooftops, etc.

The evaporating water creates the cooling effect, lowering the air temperature before it reaches the condenser coil.

The system is designed for versatility, simple installation and economical operation.

Automatic tube cleaning

Customer benefits

Automatic tube cleaning is the key to keeping heat exchangers operating at peak efficiency.

- Improved operating efficiency: the chiller continuously operates at optimum efficiency, leading to lower energy use and consequent cost reduction.
- Extended chiller life cycle: increasing return on investment, because the compressor never operates beyond its design limits and because condenser tube corrosion is eliminated.
- No chiller downtime: the automatic tube cleaning system keeps the condenser tubes permanently clean while the chiller is operating.
- Low cleaning system operating costs: the sponge balls used in the automatic tube cleaning system are the only consumables needing to be replaced.
- Lower water treatment costs: water treatment is only required to prevent scaling of ancillary equipment, leading to cost savings of as much as 50% of the cost of chemicals used for water treatment.
- Environment friendly: the automatic tube cleaning system uses no chemicals.

Main features

The Trane automatic tube cleaning system is a unique hydro-mechanical cleaning system that operates continuously to keep heat exchanger surfaces completely free from fouling.

This system can be adapted to all tube in shell exchanger types.

The Trane automatic tube cleaning can be achieved using one of two methods:

- Sponge balls, which are injected into the chiller condensing water flow to provide continuous tube cleaning while the chiller is in operation.
- Brushes that move alternatively in the tubes by reversing the water flow. The tubes are maintained perfectly clean to ensure the highest heat transfer and guarantee peak performances.

It is delivered fully pre-programmed, with settings that can, where necessary, be changed to cater for varying water qualities.

Adaptive Frequency Drive

For models RTHD / RTWD /
RTWB / RTAC / RTAD chillers

IMPULS[®]e

Customer benefits

- Reduce utility costs: up to 35% energy savings
- Trust electrical devices: low inrush current
- 10% power factor correction
- Low harmonic distortion
- Advanced control: touchscreen color display and data trending

Reduced inrush current

Higher efficiency

Heat recovery

Customer benefits

- Recover up to 70% of the compressor electricity input
- Reduced use of gas to heat water
- Easy to implement with guidelines and Trane support

Main features

Improve your HVAC system efficiency by implementing heat recovery to your existing chiller. Trane heat recovery has no impact on chiller performances and will help reduce energy consumption to generate heat.

Trane heat recovery solution is available for Trane Air Cooled chiller:

- RTAC
- RTAD
- RTAA
- CGAM

Trane heat recovery solutions apply perfectly to

- Industrial application where cooling is required for your process and heating is required for warehouse.
- Hotel: producing sanitary water and cooling building at the same time.

Refrigerant retrofit

Customer benefits

Trane refrigerant retrofit is the key to upgrading HCFC 22 equipment and maintaining optimum performance and efficiency.

A retrofit ensures that your system complies with international ozone regulations.

Trane can advise on the best way to maintain optimum performance and efficiency.

Main features

Options for HCFC 22 replacement include:

- Retrofit to an HFC refrigerant. This can be an attractive option, depending on equipment type, age and working conditions. Only Trane has the necessary computer based selection tools to do the retrofit properly and ensure the results.
- Keep operating your HCFC equipment after 2015. Trane can advise you on refrigerant containment strategies.
- Replace your HCFC equipment before 2015 with equipment using non ozone-depleting HFCs.

Trane Engineered Retrofit

A Trane engineered retrofit, factory tested and qualified, optimizes your chiller to meet your current operation needs. Performed on site it will restore your chiller to its original state, allowing your system to run at peak performance with ozone friendly refrigerants (R134a, R404A, R407C).

Trane Soft Retrofit

A soft retrofit can act as a bridge to either an engineered retrofit or equipment replacement if fast action is needed due to breakdown or refrigerant loss. In such cases, Trane can provide an economical solution using an alternative refrigerant. The soft retrofit depends greatly on the type of chiller and heat exchangers, running conditions, levels of expected performance and climatic conditions.

HCFC 22 production stopped at the end of 2009. Recycled or reclaimed refrigerant is available but not sufficient, consequently a shortage of HCFC 22 is inevitable and can lead to both unplanned downtime and aggressive price rises. The limited availability will also increase the risk that certain companies might be “polluted” or illegally imported virgin HCFC 22. It is, of course, illegal to use such refrigerants and doing so can put your business at risk.

HCF 22 Availability versus Price (EU only)

Refrigerant management

Customer benefits

- Early awareness ensures earlier corrective actions
- Proactive measurement 24 hours a day, 365 days a year
- Reduction of your building and system impact on the environment and human health
- Improvement of your equipment operation.

Leakages impact reliability and energy efficiency

- Risk reduction of costly breakdowns
- Extension of your equipment lifetime.

Optimal refrigerant charge reduces component stress

- Compliance with (EU) F-Gas regulation and/ or ozone regulation workplace codes (health and safety), and other national regulations.

Main features

Standard monitor

- Technology: Semi-conductor
- Integrated visible and sound alarm
- Multi-refrigerant control
- Sensitivity: 10ppm
- Analog connectivity: Free relays
- Can be connected to a Trane Building Management System

Premium monitor

- Technology: Photo-acoustic Infrared
- LCD display
- Multi-refrigerant control
- Sensitivity: 1ppm
- Digital connectivity: Free relays, 4-20 mA analog output or serial communication (RS 232)
- Can be connected to a Trane Building Management System

Leak testing

Trane offers a tailored leak testing procedure to identify where a refrigerant leak occurs. This procedure is an integral part of any Trane maintenance contract but can also be ordered as a separate service solution.

Trane Acoustic solutions

Customer benefits

Noise disturbance can be source of conflict. Make sure the facility occupants and neighborhood are evolving in a high quality environment.

Trane solutions can reduce sound level of up to 6 dB(A) corresponding to noise emission reduced by 75%.

Main features

Trane offers a wide array of sound level reduction solutions:

- **Compressor sound enclosure:** Trane designed and manufacture compressor enclosure specific to its compressor. So you can make sure noise are contained within the enclosure.
- **Fan speed reduction:** Sound level can be reduced by 4 dB(A).
- **Night time settings:** Adapt your fan speed to your actual building needs.
- **Compressor discharge muffler:** Purpose designed silencers can be fitted at the compressor discharge.

Chemical analysis

The Trane Chemical Laboratory has developed the specialized expertise to analyze various types of fluids found in your HVAC installation.

Having regular analyses done by experienced service engineers helps reduce maintenance costs and guarantee equipment efficiency and reliability. Problems can be found and fixed before they become major.

- Fast delivery of results
- Graphs of the current test data with past test data for easy comparison
- Past and present interpretations and service recommendations

Compressor oil analysis

- All compressor makes and types (scroll, reciprocating, helical-rotary and centrifugal)
- Helps extend the life of the existing charge and maintain compressor efficiency
- Allows compressor repairs to be scheduled to reduce downtime
- Identify problems without tearing down the compressor
- Reduce problems of used oil disposal
- Lower refrigerant emissions
- Standard testing includes: ferrous index, non-ferrous index, particle count, spectrometry, wear level evolution chart, contamination index, total presence of moisture, contamination level evolution chart, chemical index, dielectric test, viscosity at 40°C, viscosity index, chemistry level evolution chart, TAN (total acid number) test.

Refrigerant analysis

- Detects contamination levels. When contaminant levels fall outside acceptable ranges, corrective actions are recommended.
- All types of refrigerants
- Helps extend the life of the existing charge

Lithium bromide analysis

- Detects substance imbalance
- Corrective actions are recommended if necessary
- Helps extend the life of the existing charge

Vibration analysis

Customer benefits

Every piece of HVAC equipment with rotating components has its own vibration signature.

Any change in this signature can be used as an accurate means of identifying developing problems such as bearing wear, shaft imbalancing, and degrading helical-rotary compressor rotor tolerance.

The monitoring and diagnostics system will reliably detect not only potential defects at the initial stage of their development but also identify the exact defect type and its severity. Vibration analysis can identify problems long before they become noticeable.

Main features

The vibration measurement and analysis techniques used by Trane can identify a wide range of developing faults such as shaft misalignment, bearing defects, imbalance, or motor electrical problems.

Sensitive sensors are installed in carefully selected places. The smallest deviation or any abnormal behavior is detected and recorded. The vibration spectrum of your equipment illustrates its internal condition. These graphs are simply and clearly explained to you. To help you further, we will provide you recommendations in terms of maintenance scheduling.

If the vibration analysis report indicates, for instance, an imminent compressor fault, then we will advise you how to plan for a scheduled compressor renewal.

Compressor R'Newal™

Customer benefits

Equipment breakdown can have disastrous consequences. In human terms, it can mean discomfort to building tenants, leading to dissatisfaction and complaints. In financial terms, it can mean extensive repair or replacement costs. But with Trane R'newal™, all this can be avoided.

The Trane R'newal™ program is a comprehensive service solution designed to restore your chiller's compressor performance and reliability to like-new levels.

Main features

The R'newal™ service restores your compressor to like-new specifications and operating condition:

- Thorough cleansing
- Clearance measurements
- Mechanical parts are ground and polished where necessary to restore optimal operation.
- Motor: thorough electrical tests, revarnishing or new replacement motor fitted.
- Original quality parts replacement: bearings, gaskets, non-return valve, capacity control valve, lip seal, motor terminals, impellers.
- Remounting
- Packing: compressor is painted and packed for shipping to your site.

Eddy current tube analysis

Customer benefits

- Improved equipment operation and reliability
- Extended equipment life
- Reduced operating costs
- Reduced risk of costly breakdowns
- Reduced downtime.

Main features

The condition of the tubes in a shell and tubes heat exchanger has a direct impact on the efficiency of your chiller. Depending on its size, a heat exchanger contains hundreds or thousands tubes, all undergoing mechanical stress and chemical corrosion. Tubes are therefore critical to chiller performance, and yet standard maintenance techniques can check most everything except these tubes.

Equipped with the latest technological tools, Trane can detect, locate and record internal and external corrosion, deposits, wear or cracking before their consequences start to damage your installation.

This analysis results in a detailed report containing all the recordings, photographs of defective zones, and most importantly, recommendations as to the technical and practical actions required to resolve the situation.

Thermography

Trane Thermography is a non-invasive, safe and proven predictive service that detects potential risks in electrical and mechanical equipment. Plus, because your plant can remain up and running, you'll have a clearer picture of where potential breakdowns are hiding, before it's too late.

Customer benefits

Prevent unscheduled downtime

Trane Thermography is perfect for electrical inspections – as well as mechanical inspections. For example, as electrical connections become loose, there is resistance to current that can cause an increase in temperature, which means energy is wasted generating heat. As a result, components can fail, causing unplanned outages and even injuries. Through Trane Thermography, however, potential hazards the human eye can't see become crystal clear.

Main features

A snapshot of equipment components

Differences in temperature are key elements in monitoring equipment. As thermography captures an object's heat signature, it creates a two-dimensional color image of the equipment components. That image will then be used to compare a good component to a problematic one and detect any potential risks. Thermal imagers can also store heat signatures for comparison and upload images to a database.

Picture perfect analysis

When it comes to predictive maintenance, thermography has become a preferred choice among building owners, managers and operating engineers. It's easy to understand why. With no downtime or interruptions required, instant imaging and picture perfect analysis, Trane Thermography is the ideal way to help keep your plant running safely and reliably.

Trane controls services

Comprehensive service contracts for building controls systems

Customer benefits

Regular controls servicing results in continuous comfort for the occupants, and the lowest possible operating and maintenance costs. By regularly monitoring and adjusting your existing controls system Trane will also enable you to operate without emergency failures.

Trane has the expertise to optimize the safety, comfort, and efficiency of all the mechanical and electronic components of your HVAC system.

We can help you manage your building systems to ensure their optimum operation. With a Trane Controls Service plan, each passing minute generates energy savings and improves your cost of ownership.

Main features

Your building is a complex, inter-related set of systems. Over time lots of small changes can cause major shifts in comfort, efficiency and safety levels. Trane maintenance for building controls systems is your strategy to keep everything optimized.

Our trained specialists can advise you on what impact any change may have. They can also monitor your system and identify clues, such as a 1°C deviation as being caused by a 10% leakage elsewhere in the system. Most importantly, our engineers will treat your building controls system as an integrated whole and when changes are necessary they will take appropriate programming actions to ensure there are no negative effects elsewhere in the system.

Customer's needs	Services	Equipment	Controllers	Applications	User Interfaces
Optimized systems giving safety, comfort and efficiency: - Commercial offices - District cooling - Education - Health care - Life sciences - Lodging - Industry - Institutional - Retail	- Cost of ownership - Maintenance - Upgrade - Replacement - Parts - Audit - Training	- Chilled water terminals - Variable air volume - Air handling units - Rooftops - Water chillers - Cooling towers - Dry coolers - Variable frequency drives	- ZN 523/ZN 525 - CH 530 - EX2 - MP 501/503 - PIC - MP 581 - BMTX - UC800 - Tracer UC - Tracer SC	- Intelligent room control - Chiller plant control - Boiler plant control - Free cooling and heat recovery - Variable air volume systems	- BMS workstation - Web server - Touchscreen display - Wall sensor

Chiller plant audit

Identifying strategies to reduce your operating costs

Customer benefits

- Measure actual chiller plant operation and performance
- Provide system improvement recommendations
- Support decision for change

Main features

- Measure chiller and chiller plant operation (temperature, water flow, power consumption)
- Define building load profile
- Complete report including status of existing plant, improvement opportunities, financial benefits (payback time).

Metering

Measure, calibrate and upgrade

Customer benefits

- Constant monitoring of energy consumption including the impact of any energy conservation measures
- Benchmark energy usage
- Traceability of plant operation (temperature trends, cooling production, energy usage, plant efficiency)
- 1 year history

Main features

- Plug and play system. Can be installed on any installation
- Measure electrical consumption of 2 electrical devices
- Measure system efficiency

EnerviewScreen

OptiPlant

Customer benefits

- Lower operating and maintenance costs:
 - Reduced operating hours delivers 15% or more reduction in energy consumption and correspondingly reduced operating costs.
 - Fewer run hours means longer component lifetime and lower maintenance costs.
- Easy chiller control: intuitive screens allow easy monitoring and control of the plant.
- Traceability of plant operation: displays event log and system temperature trends over the seven previous days.
- Rapid return on investment: payback achievable in less than two years in an average size office building.

Main features

Trane's unparalleled knowledge of commercial cooling systems combined with control expertise has produced OptiPlant, a prepackaged control solution. OptiPlant can be installed, commissioned and operated by a non-control technician. A visually intuitive display makes it quicker and easier to commission the solution and to access its control capabilities.

Optional metering

- Measure energy consumption of each chiller
- Display shows daily, weekly and yearly power consumption
- Measure efficiency level

AdaptiView™ upgrade

For centrifugal chillers
and models RTHA / RTHD

Customer benefits

If you are a building owner who has an older Trane CenTraVac™ chiller, this is the right solution for you. The Trane Tracer AdaptiView™ control panel upgrade allows you to update your chillers to the same controls offered on new Trane CenTraVac™ chillers.

Tracer AdaptiView™ helps operators keep the chiller plant running at its most efficient level. All this is made possible by a graphical user interface that provides deeper understanding, along with quicker response times.

- Improves operator productivity
- Guarantees continuous operation utilizing industry best adaptive control algorithms
- Optimizes chiller operation
- Offers easier integration in Building Automation Systems thanks to open protocol flexibility

Main features

- 1 Large, full-color touchscreen for fingertip control of chiller subsystems
- 2 Instant access to operational data for faster issue analysis and resolution
- 3 At-a-glance status updates readily display key operating parameters
- 4 Easy-to-read trending charts and diagnostic reports help fine tune chiller control
- 5 Industry-leading algorithms optimize control during rapidly changing conditions

Specifications

- Adjustable arm and tilt screen for better viewing
- Opened protocols: BACnet, MSTP Lontalk, Comm4, Modbus Slave
- Optional cover UV IP56 available for outdoor usage

FreeCool

Customer benefits

Implementing energy efficient solutions such as free cooling requires design expertise and significant investments in time and money. Prepackaged solutions address these challenges while optimizing cost and payback.

- Reduce electricity peak demand in winter
- Save up to 25% of chiller plant energy consumption
- Design and built in-house
- Plug and Play installation
- Limited hydraulic modifications to minimize chiller plant disruption
- Preprogrammed control reduce commissioning time

Main features

Trane FreeCool comprises all the components required to operate a free cooling system. It is a factory built, configured and tested package.

- Advanced control logic to maximize energy savings
- Preprogrammed controls with configurable parameters
- Trane TD7 available in multiple languages
- System scheduling
- System alarm notification
- Energy metering and performance trending
- Electrical protection devices
- IP55 and freeze protection for outside installation

HVAC parts and supplies

Having the right part for your needs is only part of the story

From precision Trane original to generic parts, Trane offers a comprehensive parts inventory to answer customers' needs. This means finding the right part for you, regardless of who makes it. Whether you are looking for compressors, controls, electrical supplies, HVAC accessories, chemicals, or tools and tests equipment, we can give you a competitive edge.

State-of-the-art logistics

We have the infrastructure to find, deliver and even install the required part anywhere in the world with a minimum of downtime. Trane is committed to giving you the best value backed with the most advanced logistics infrastructure and a highly efficient distribution network.

- Central warehouse in Genk, Belgium with 5 000 references.
- Logistic platforms in Trane factories.
- Local parts centers to ensure all your parts needs are fulfilled.

Easy to do business with

- Simple to contact a Trane service expert.
- A reliable and loyal partner.
- Consistent level of service throughout Europe, the Middle East and Africa.
- A single-source supplier for Trane original and generic parts, simplifying purchasing processes and invoicing.

Expertise

- With over 100 years of experience, Trane stands out in the industry as a reference in terms of innovation, high quality and efficient service.
- Highly qualified Trane professionals provide the right solution for your specific needs, no matter what your system, budget, or brand requirements might be.

Fast and efficient

- Easy access to parts information and quick quotations.
- On-line inventory management system offers realtime visibility of inventory levels to all Trane sales offices.
- Strategically located near international carrier hubs, Genk central warehouse enables late order processing with guaranteed next day delivery.
- Online tracking system provides reliable shipment status.

Competitive pricing

- On Trane and generic parts.
- On shipping costs thanks to strategically located parts centers and our extended distribution network.

Customer proximity

With 130 locations in Europe, the Middle East and Africa, Trane has one the most extended service networks always offering expert advice on the right parts, at the right place and at the right time.

Trane HVAC Kit Solutions

To better answer your needs, we have developed a greater range of professional kits for common maintenance and repairs. These kits will offer you greater peace of mind with the guarantee that you have all the parts required for a specific service intervention.

Trane HVAC kits offering

- Compressors
 - Mounting isolator kit
 - Gasket and 'o'ring kit
 - Revision kits
 - Repair kit
 - Oil line kit
 - Terminal board retrofit kit
 - Gasket kit for GP2 compressor motor change
- Trane controls
 - Wire harness adapter female kit
- Oil and refrigerant filters
 - RTAC Refrigerant filters kit
- Consumables
 - Acidity kit
 - Oil analysis kit
- CCU unit
 - Humidifier drip tray kit
 - Cylinder filter kit
- Fan coil unit
 - Electrical heater kits
 - Condensate pump kit
 - Lift pump kit
 - Housing and fan kit
- HVAC accessories
 - Ignitor burner gas kit
 - Burner fan kit
 - Retrofit centrifugal pump kit
 - Connector female kit
 - Fan motor kit
 - Motor, fan, guard kit
 - Plenum and grid kit
 - Motor assembly, grid, capacitor kit
- Rooftop unit
 - Fire thermostat kit
 - Siphon kit
 - Clogged filter detector kit
 - Electrical coil V1 kit
 - Speed variator kit
 - Fault relay kit

Customer benefits

Trane is committed to being your single-source solution for replacement coils-for any HVAC equipment, from any manufacturer. Our system offers rapid quotes. With a wide service network and over 1,000 of the best trained engineers and service technicians in the industry, Trane is always prepared to rush the delivery of your Trane SureFit™ coils.

SureFit™ coils

A Trane Parts Solution

Coils for any type of application or brand

Trane SureFit™ coils are available for the majority of applications and designs:

- Refrigerant, water, steam
- Material types: aluminium, copper, stainless steel, epoxy coated
- Chillers, air handling units, dry cooler, ...
- Numbers of circuits

Even if the original coil is not a Trane design we can provide any type of coil regardless of the brand.

Trane SureFit™ replacement coils will restore reliability and efficiency to original specifications as well as reducing operating cost.

In certain cases, it is possible to exceed original specifications.
